LAKESIDE FREIGHT · DISPATCH

Dispatch picks the journey, not just the train

Three questions our dispatch office learned to ask.

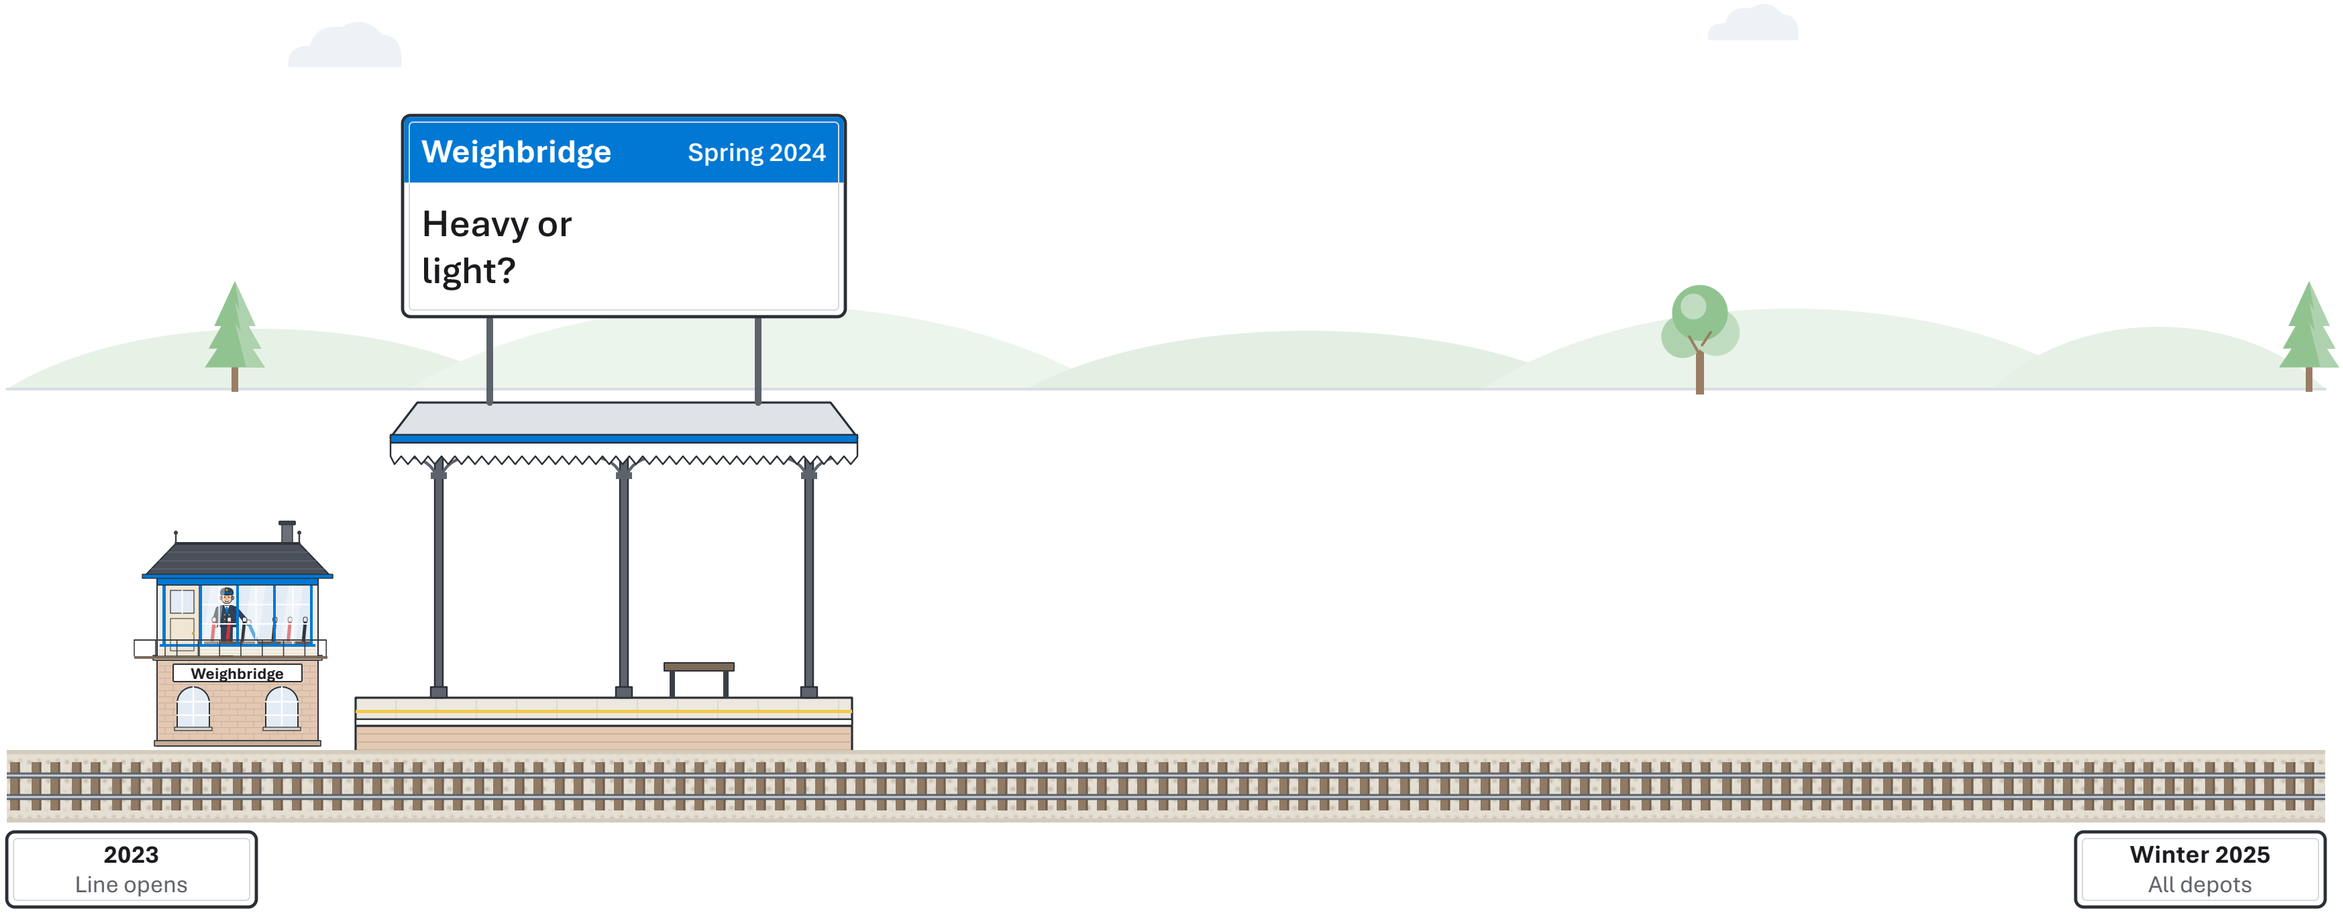

YN **Your Name** Lakeside Freight

Sources: Sample data, made up for this example

THREE STEPS

Each step changed the question dispatch asks

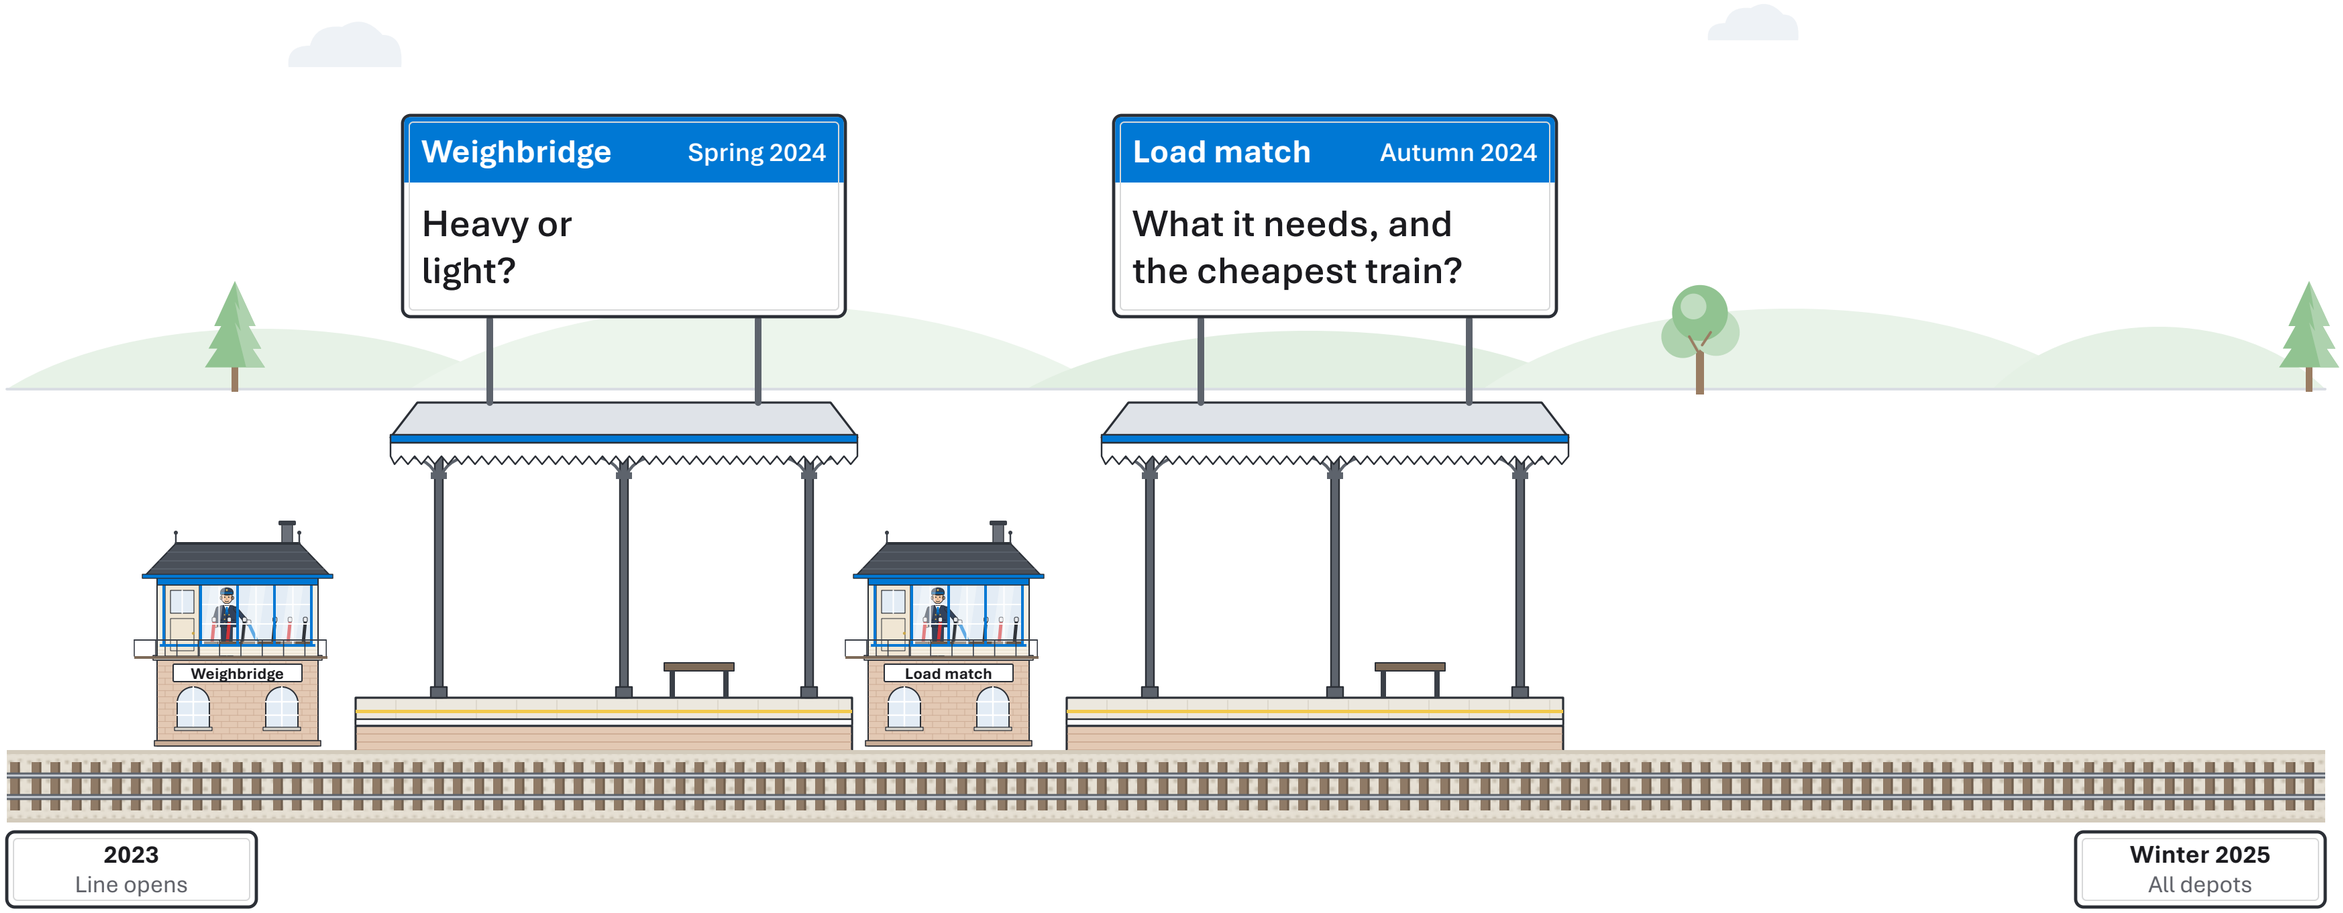

1 2 3 Step 1: the weighbridge

Sources: Sample data, made up for this example

THREE STEPS

Each step changed the question dispatch asks

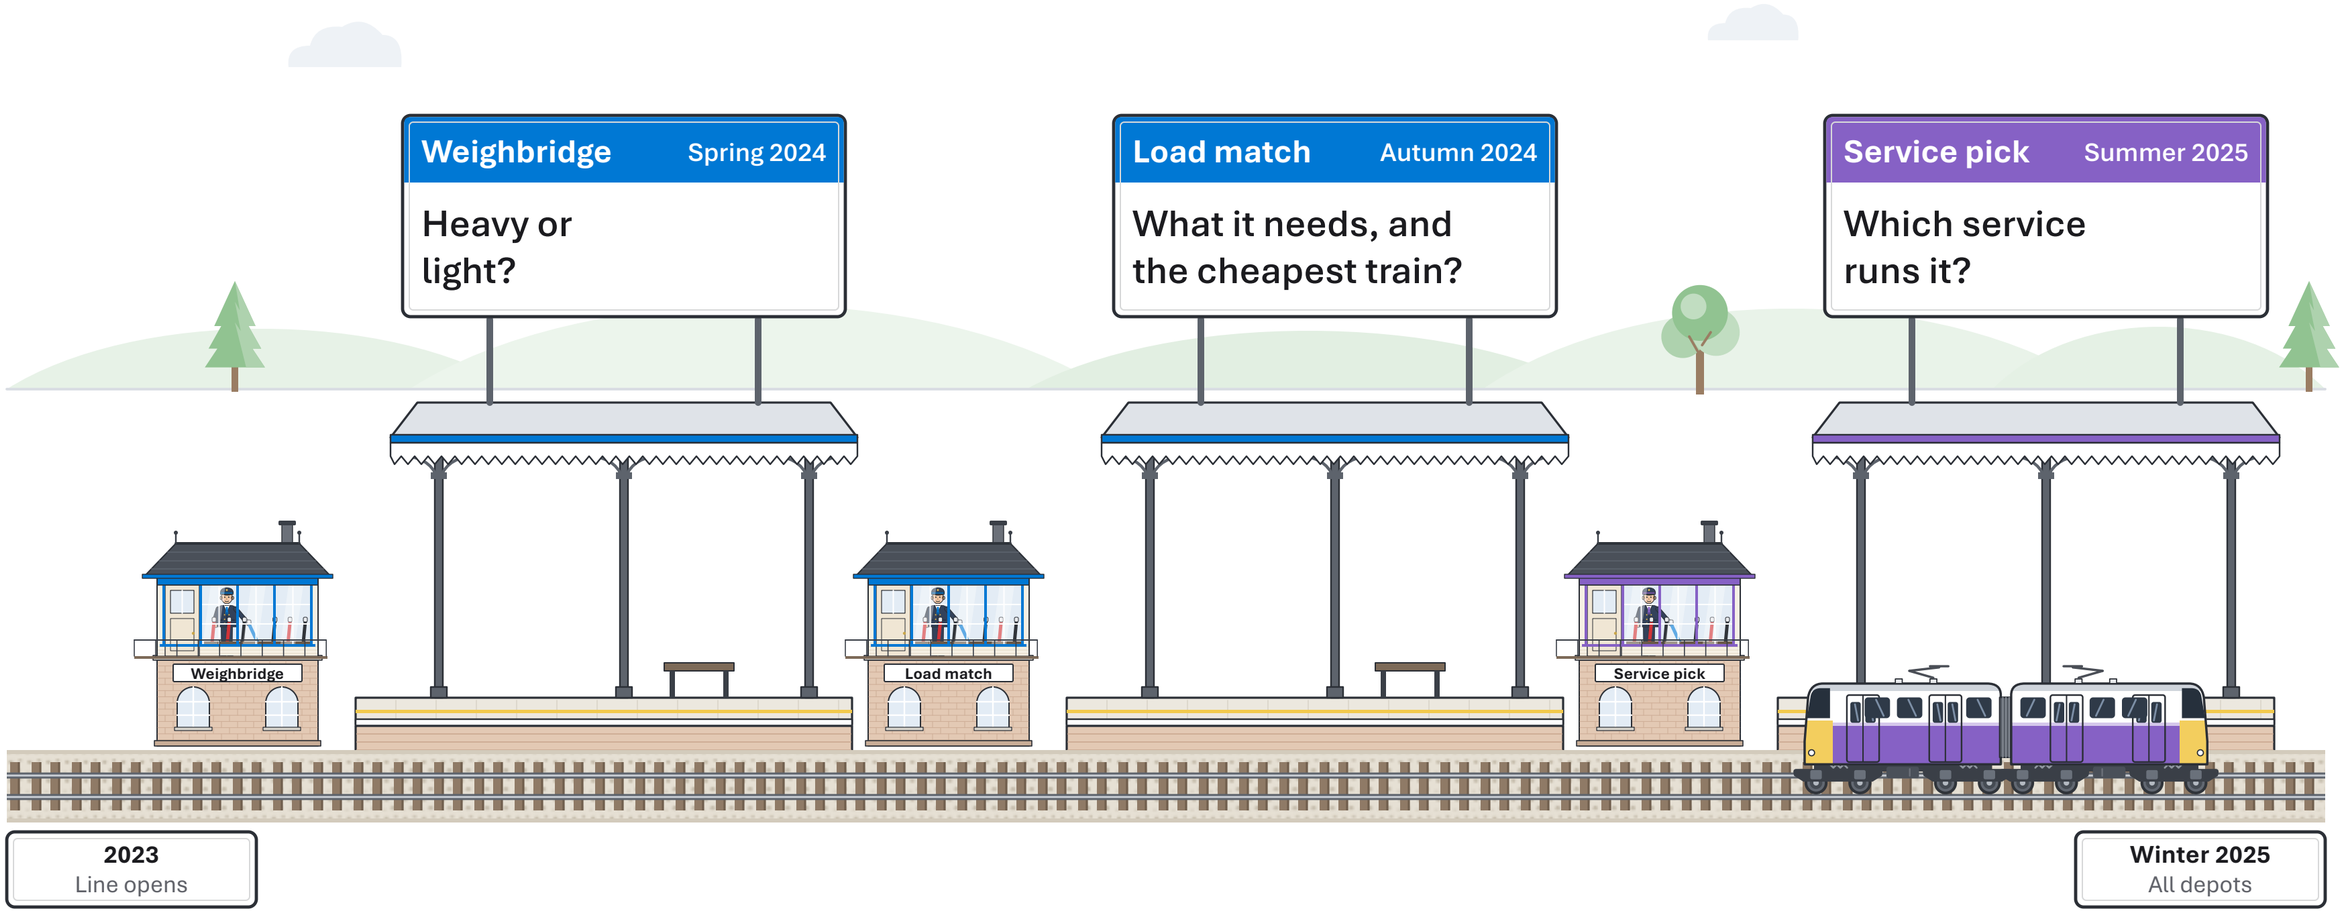

1 2 3 Step 2: the load match

Sources: Sample data, made up for this example

THREE STEPS

Each step changed the question dispatch asks

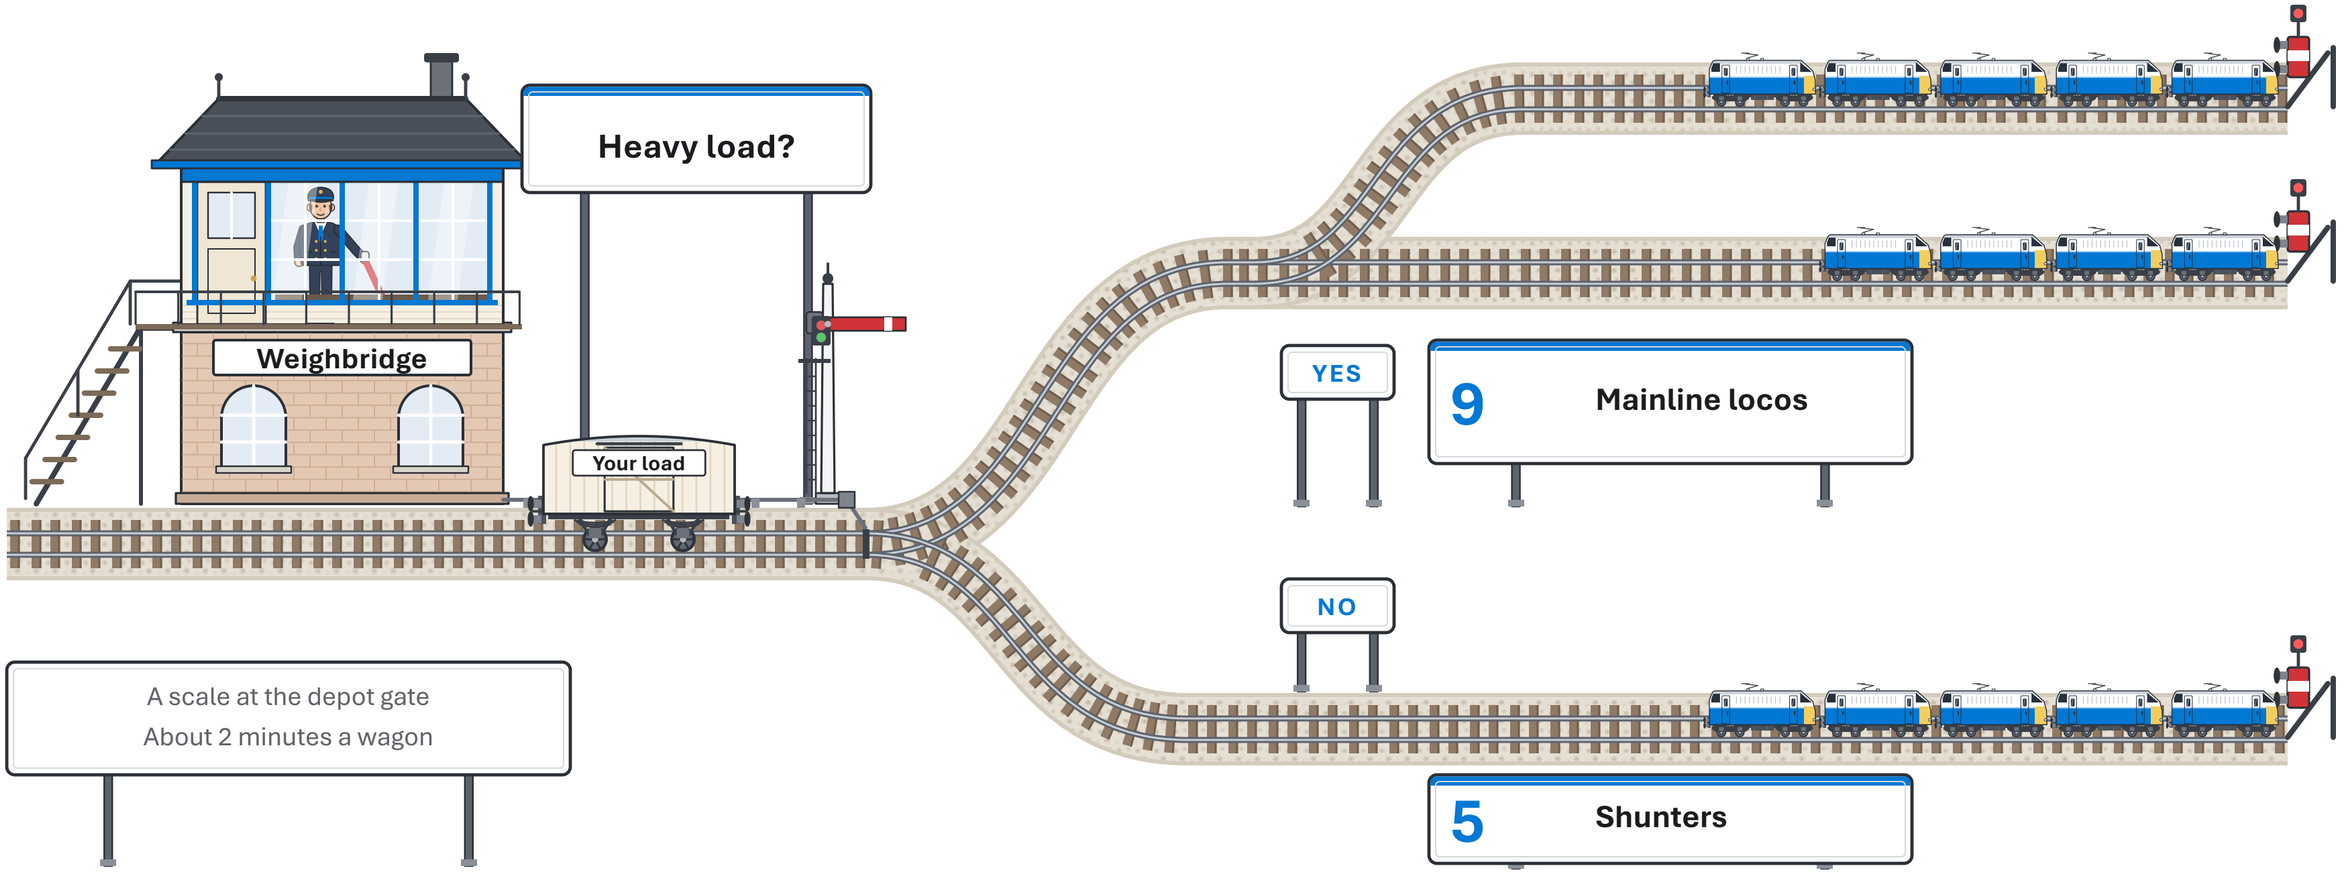

1 2 3 **Step 3: the service pick**

Sources: Sample data, made up for this example

STEP 1 · THE WEIGHBRIDGE

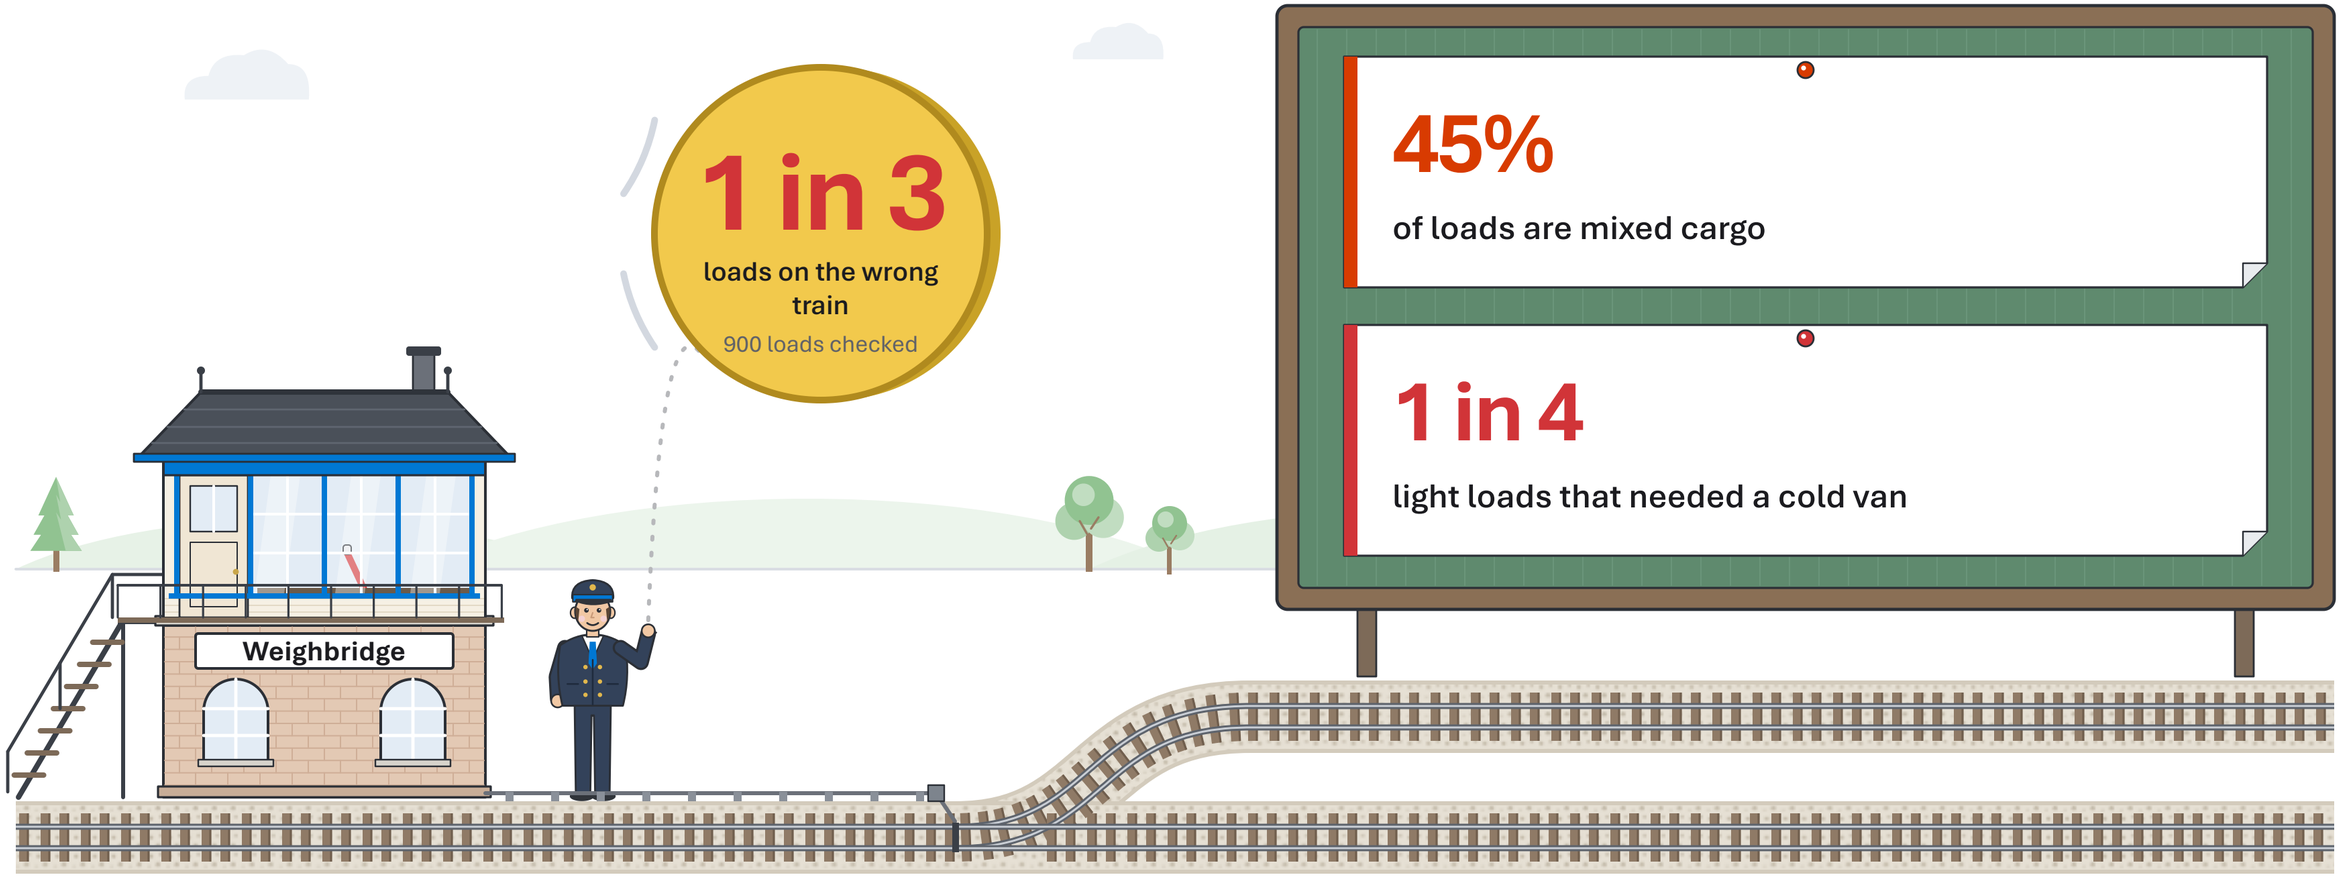

The weighbridge asked one yes-or-no question

Sources: Sample data, made up for this example

STEP 1 · LIMITS

Weight alone sent a third of loads wrong

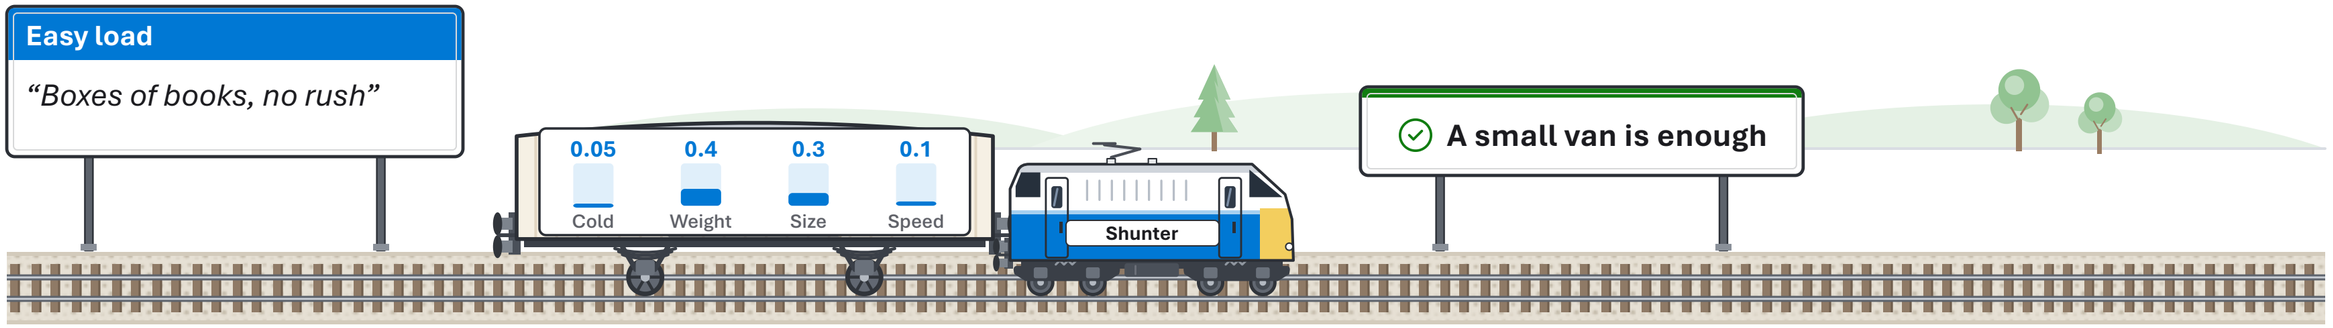

Sources: Sample data, made up for this example

STEP 2 · LOAD MATCH

The load match asks what the load needs

FOUR NEEDS, THEN THE CHEAPEST TRAIN THAT COVERS THEM

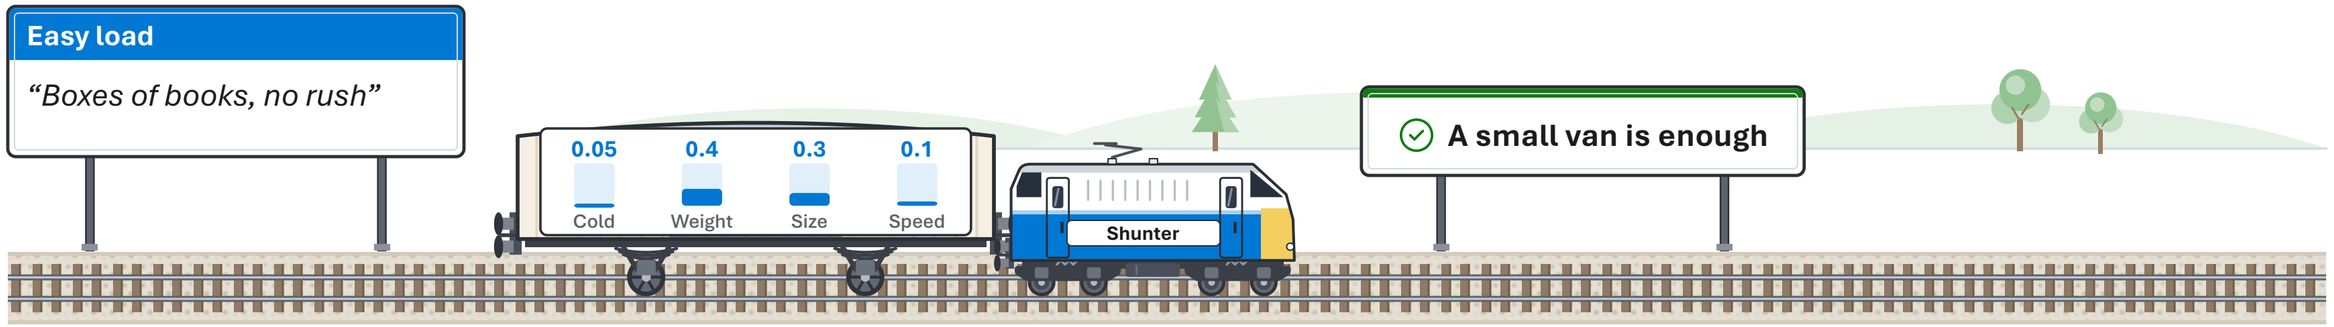

1 2 **Easy load, small train**

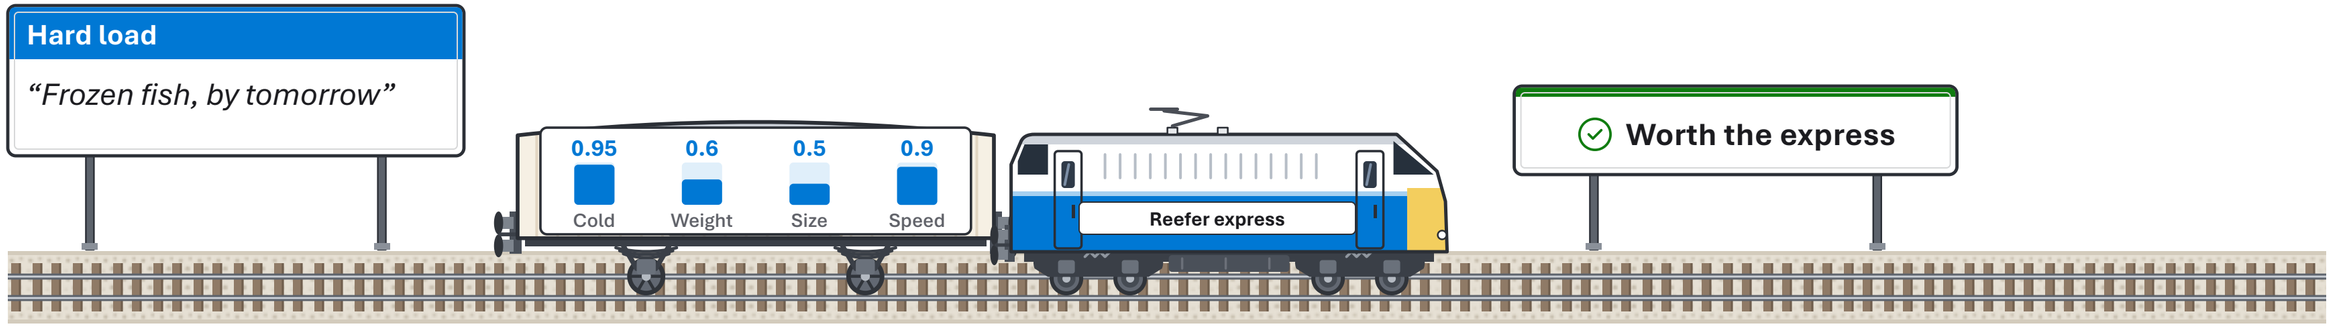

Sources: Sample data, made up for this example

STEP 2 · LOAD MATCH

The load match asks what the load needs

FOUR NEEDS, THEN THE CHEAPEST TRAIN THAT COVERS THEM

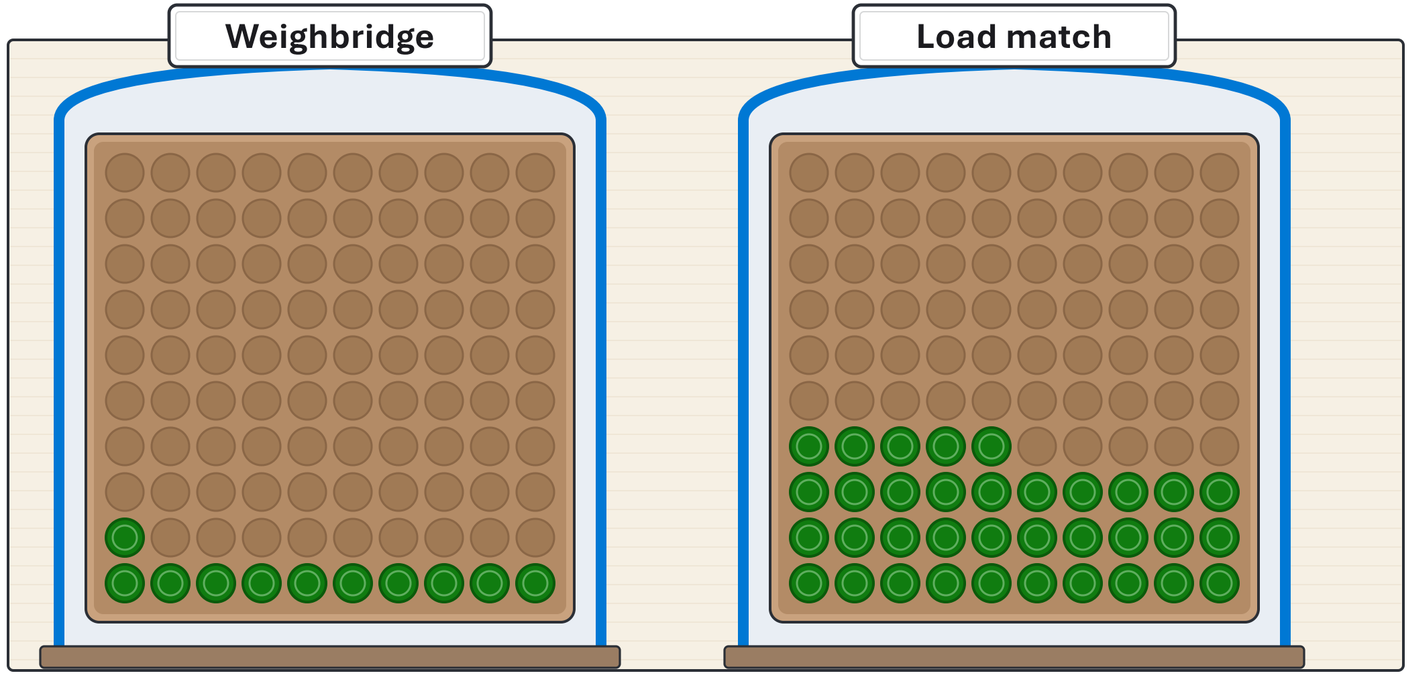

1 2 Hard load, express

Sources: Sample data, made up for this example

STEP 2 · RESULTS

Same punctuality, three times the savings

11% saved
91% on time

35% saved
93% on time

Always an express: 94% on time, 900 loads.

EACH COIN: 1% OF THE COST OF ALWAYS SENDING AN EXPRESS. GREEN: SAVED.

SIX-WEEK TRIAL ON TWO LINES

−8%
time in transit

−20%
damaged loads

−6%
cost per tonne

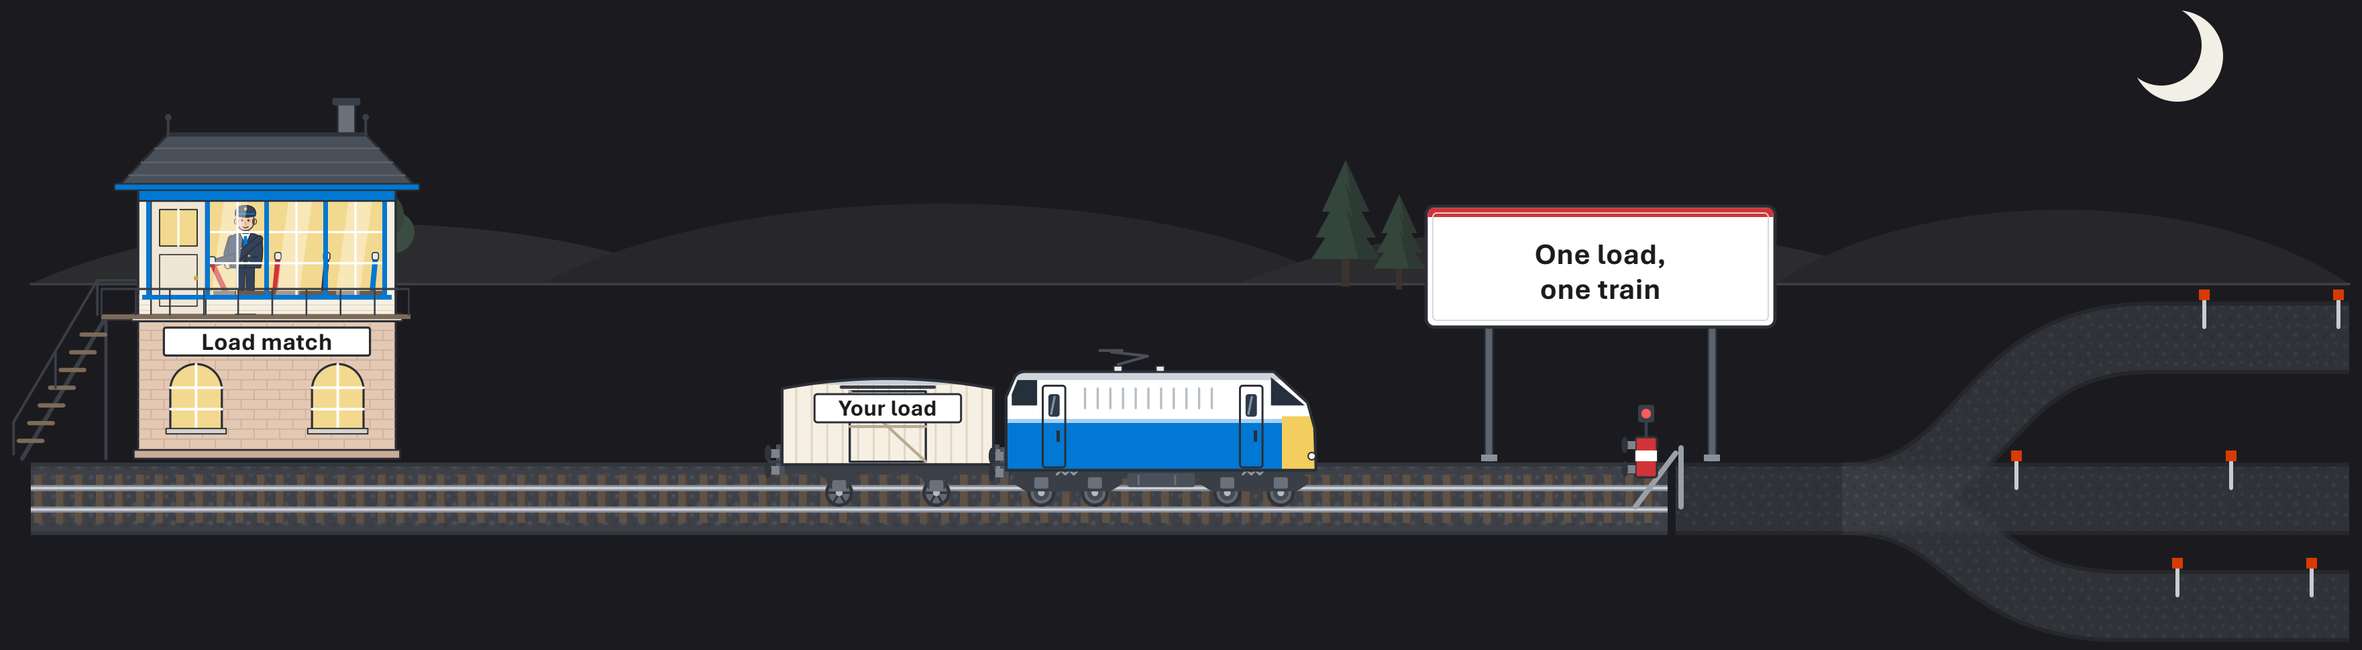

Sources: Sample data, made up for this example

STEP 2 · THE LIMIT

One train per load was the limit

“Some loads need more than a better train: they need a different journey.”

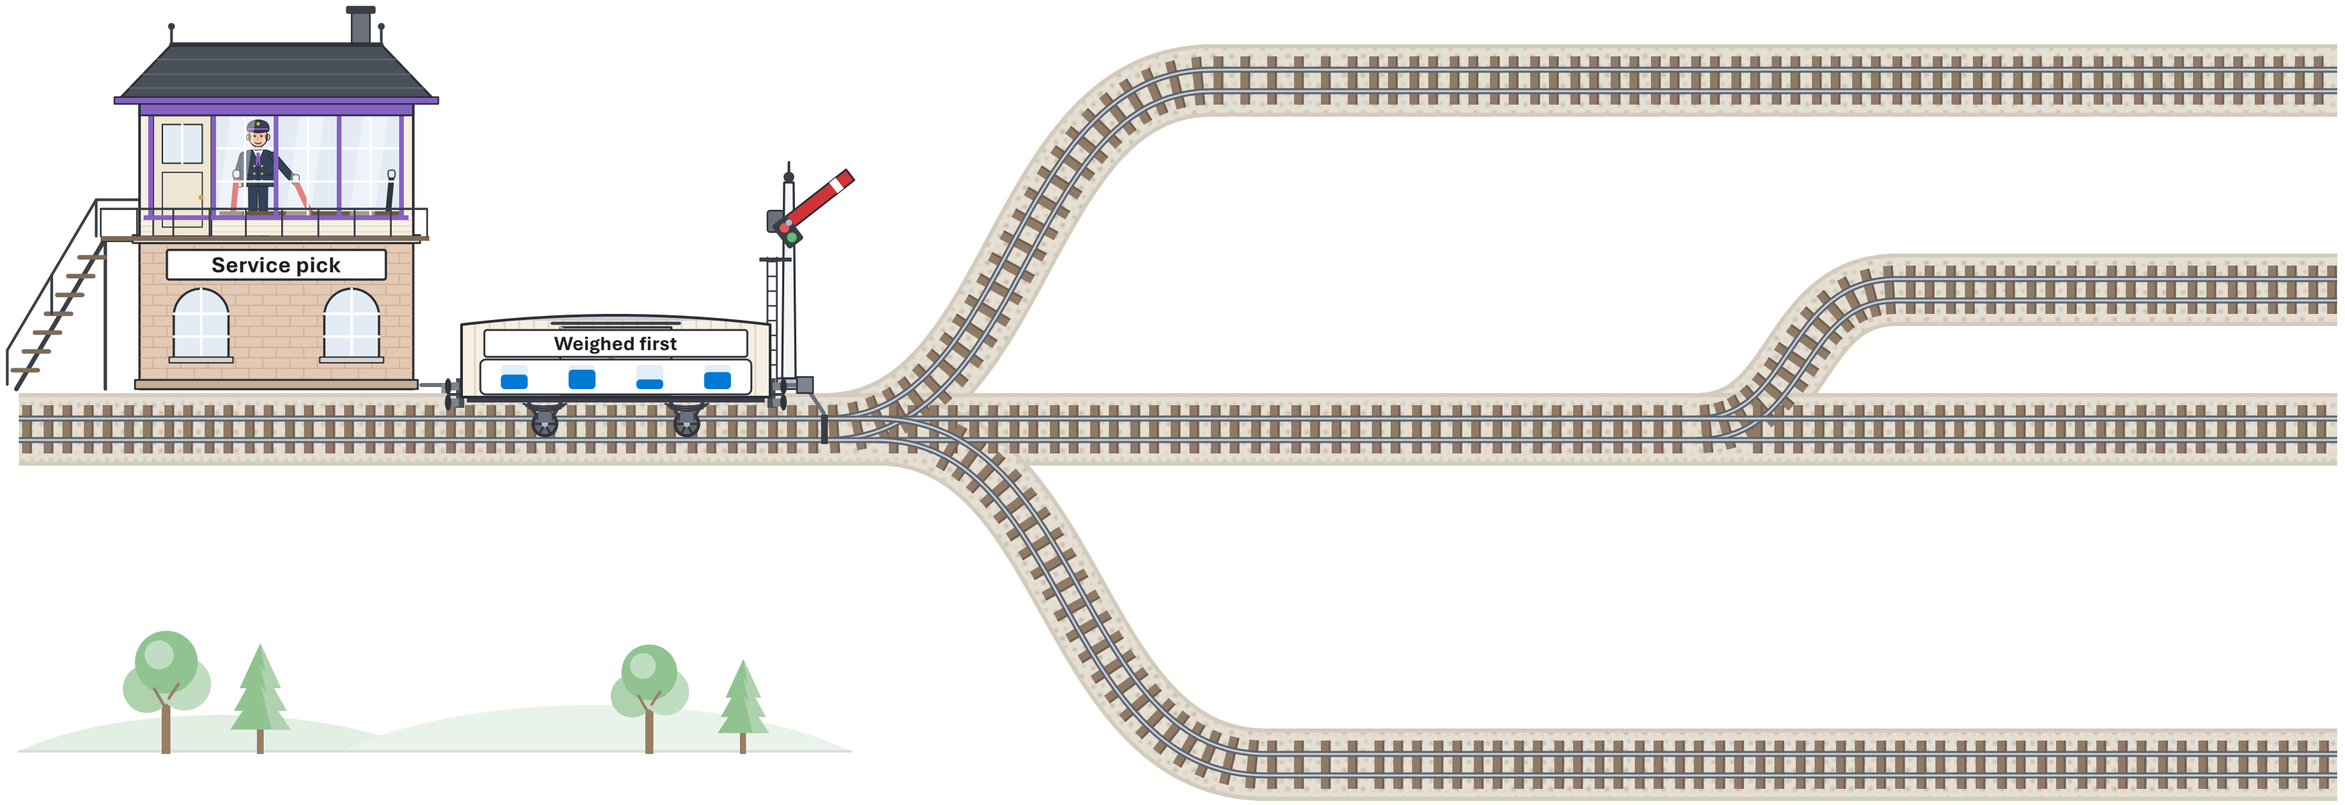

A night dispatcher (sample quote)

Sources: Sample data, made up for this example

STEP 3 · SERVICE PICK

The service pick chooses the journey

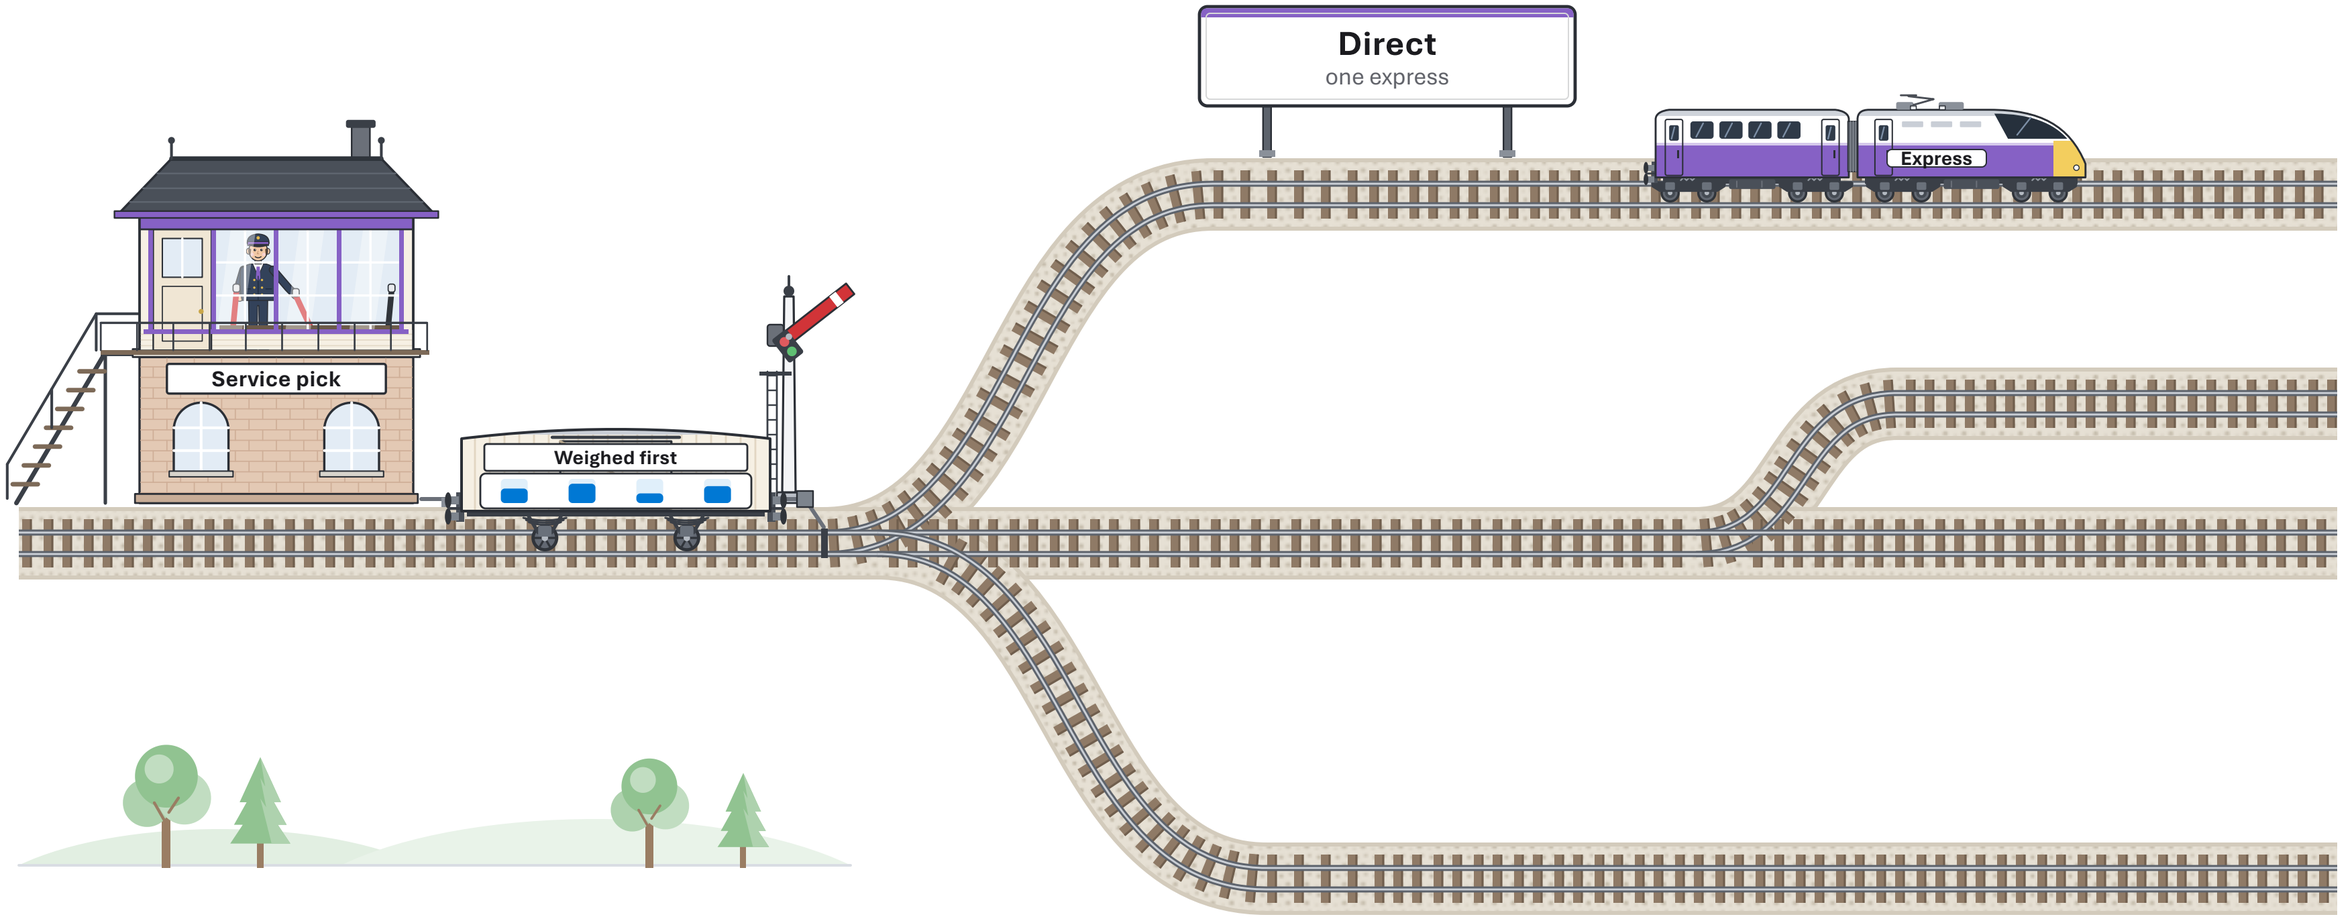

1 2 3 4 **Every load is checked first**

Sources: Sample data, made up for this example

STEP 3 · SERVICE PICK

The service pick chooses the journey

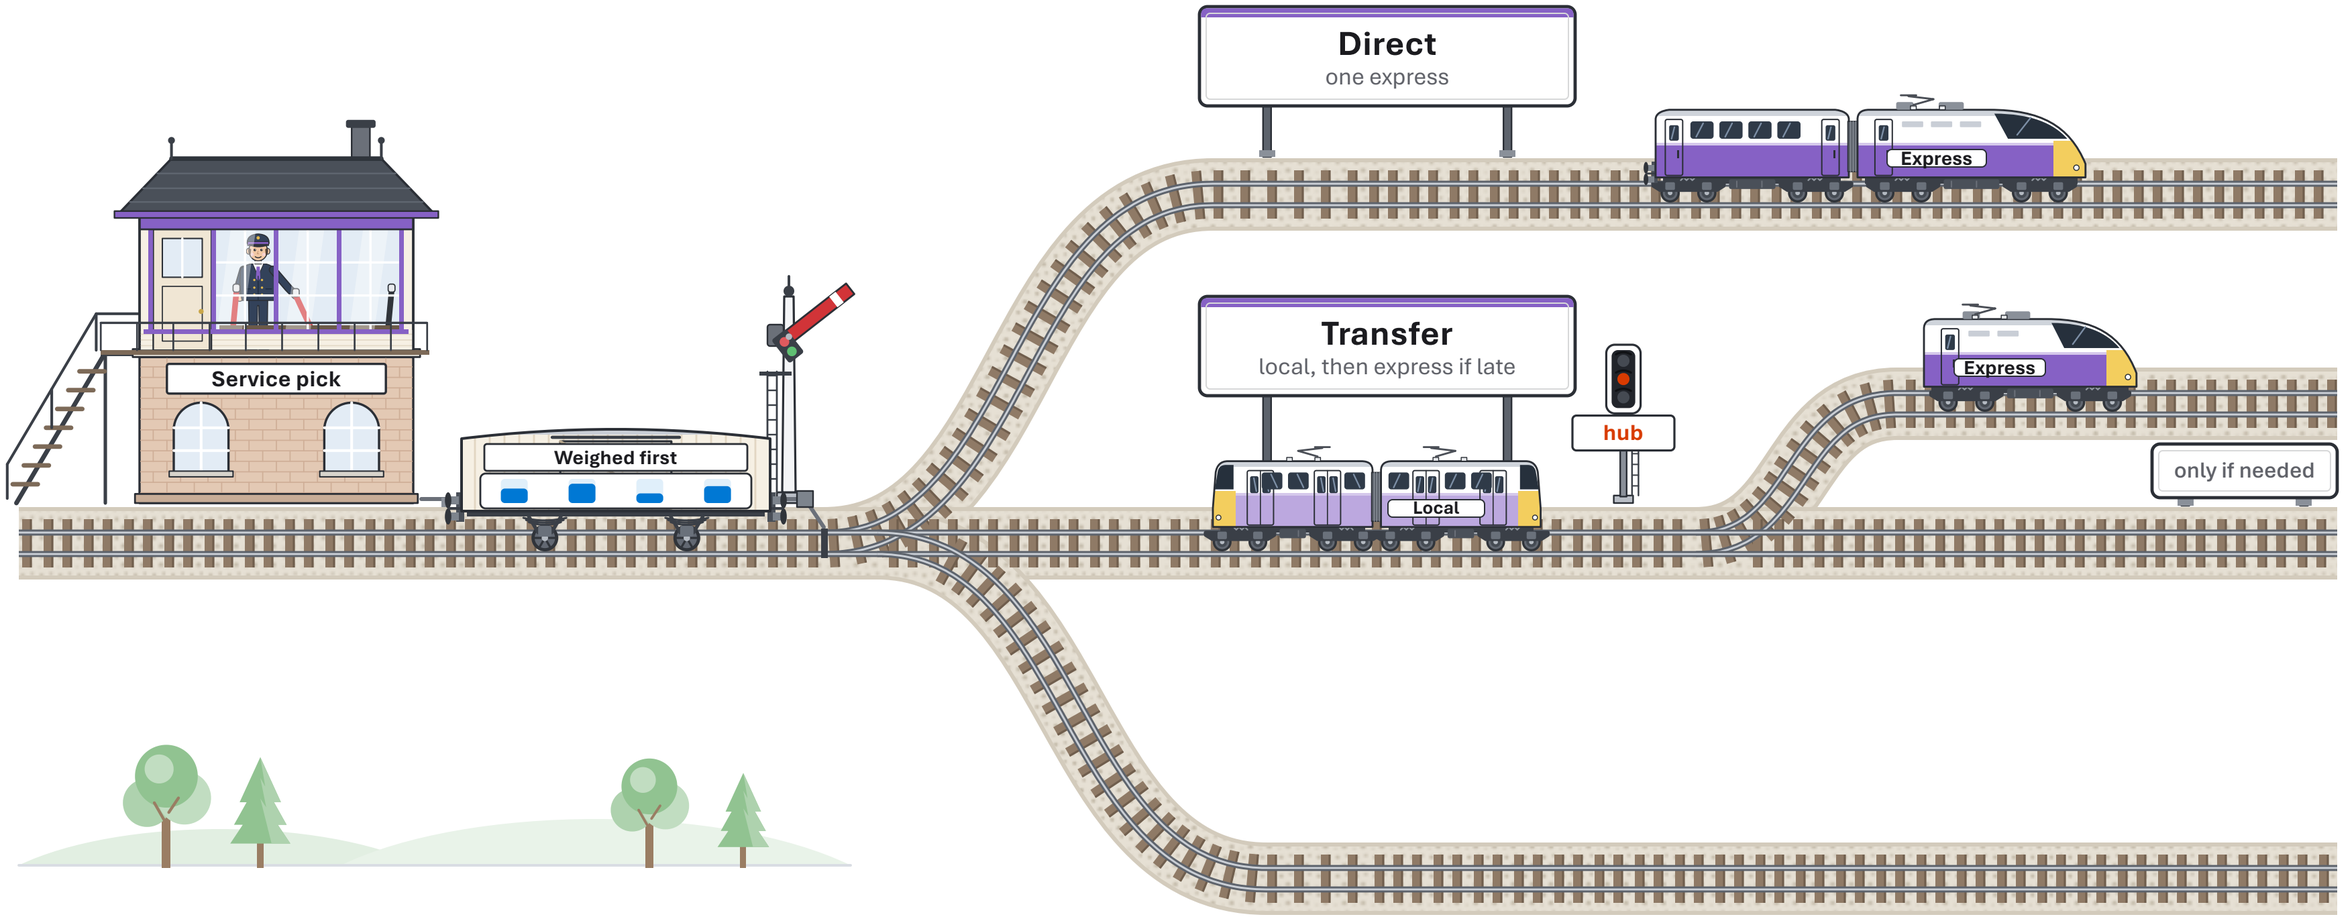

1 2 3 4 **Direct: one express**

Sources: Sample data, made up for this example

STEP 3 · SERVICE PICK

The service pick chooses the journey

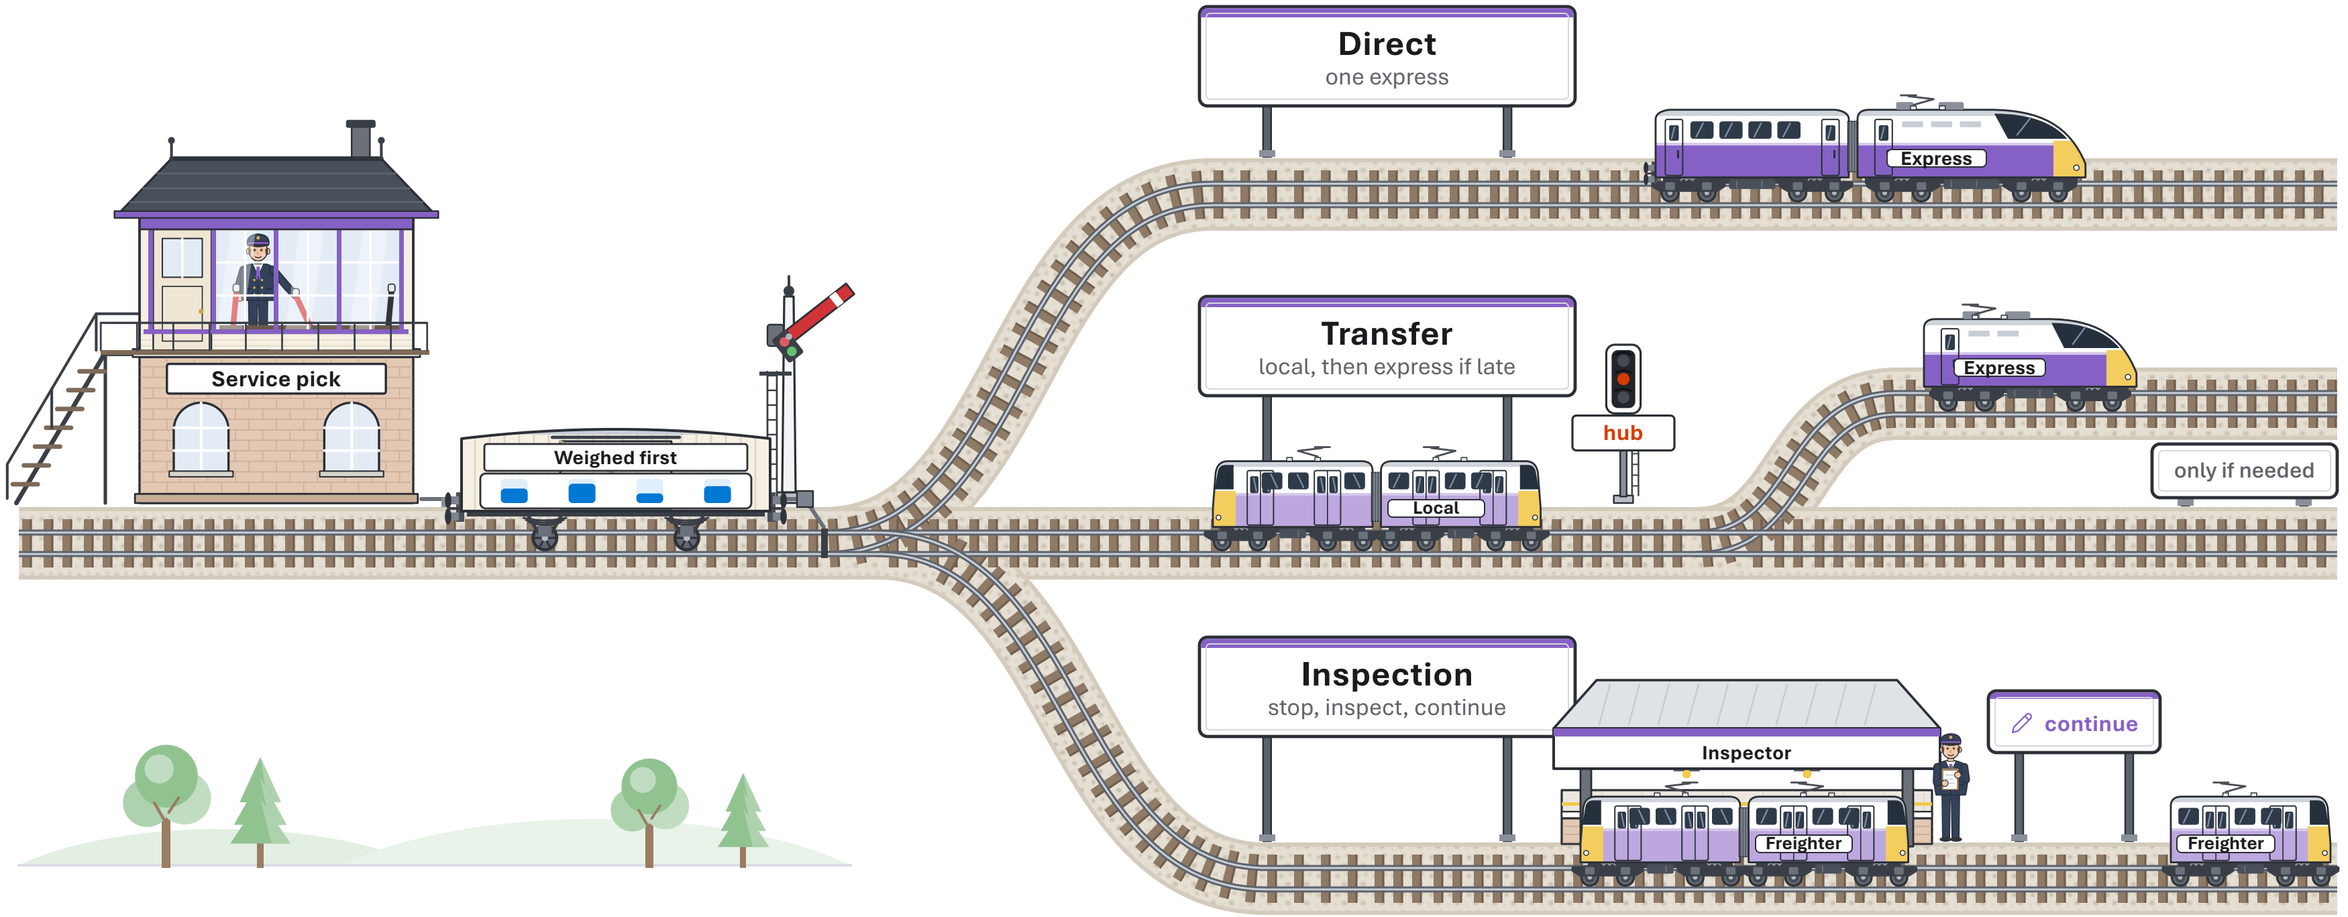

1 2 3 4 Transfer: express if needed

Sources: Sample data, made up for this example

STEP 3 · SERVICE PICK

The service pick chooses the journey

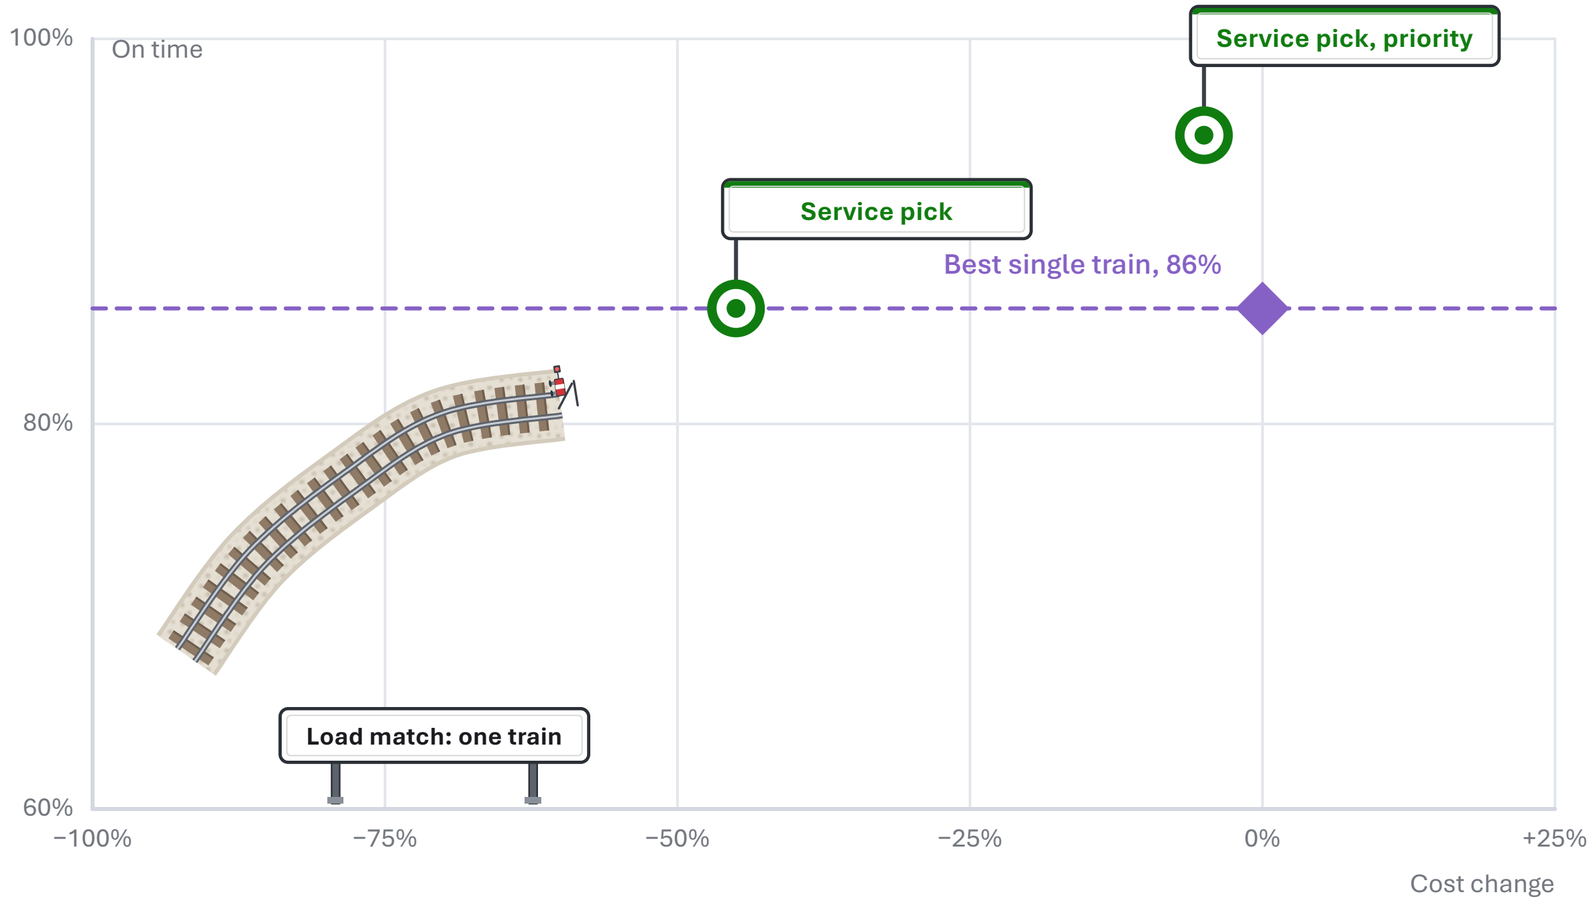

1 2 3 4 **Inspection: a stop on the way**

Sources: Sample data, made up for this example

STEP 3 · RESULTS

Picking the journey beat the best single train

Sample data

Service pick

~45%

cheaper

Service pick, priority

95%

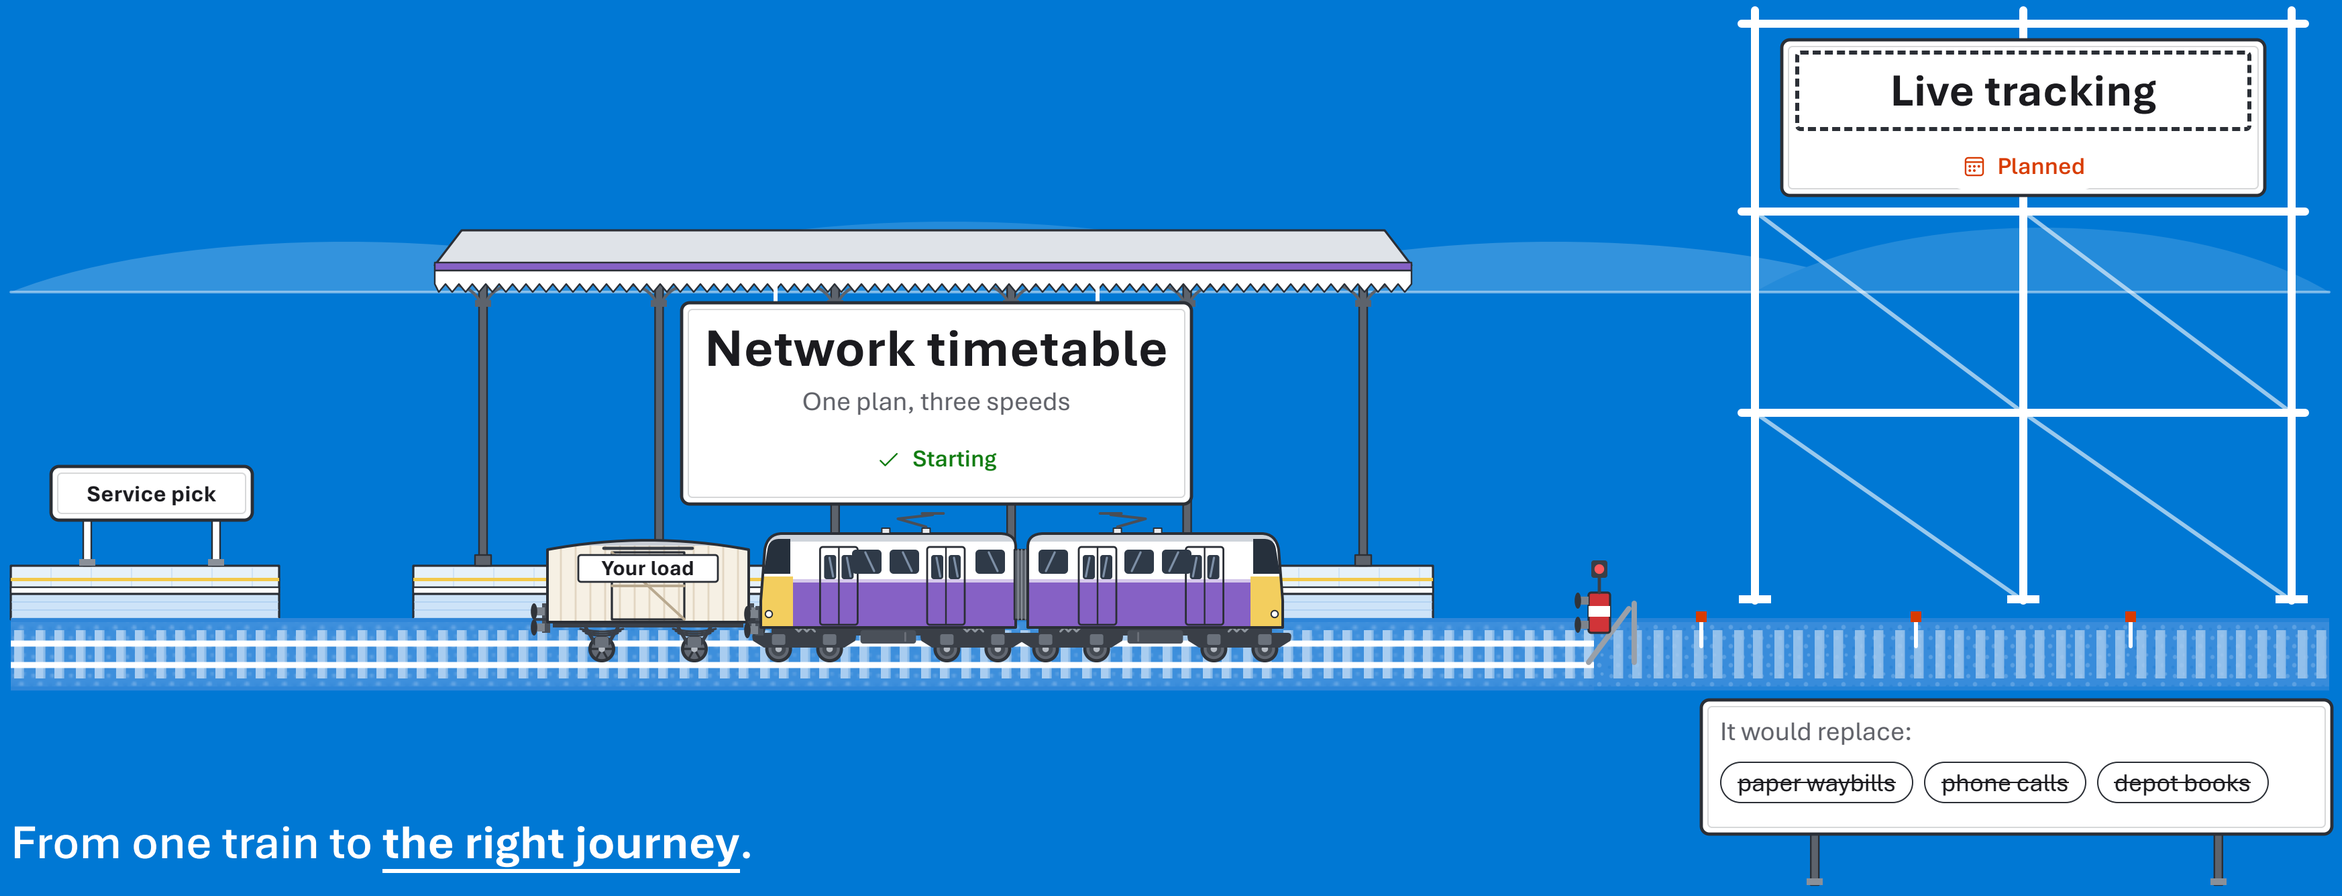

on time, ~5% cheaper

Made-up positions
