GUIDE · NOVEMBER 2026

Microsoft deck guide

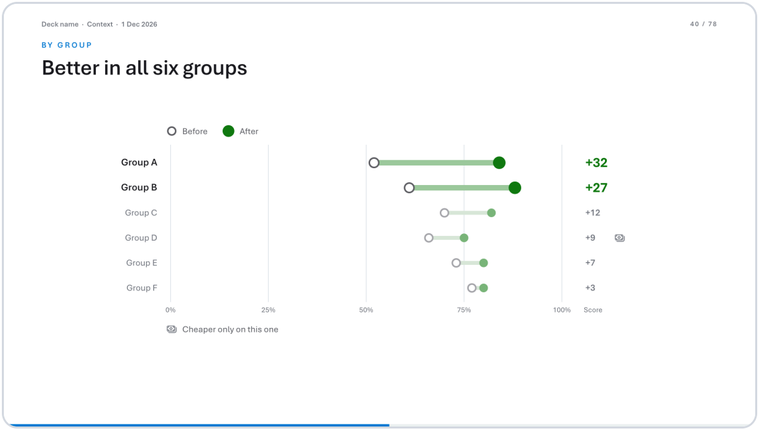

How to make slides in the Microsoft look, from a quick update to a big talk.

Federico Brancasi · Microsoft

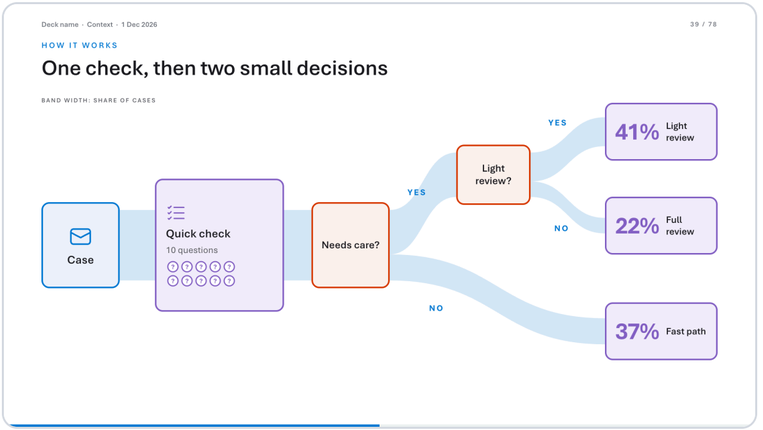

SIMPLE 1

GRAPHS 2

ILLUSTRATIONS 3

CONTENTS

What is in this guide

01 **Foundations** 5
Frame, colour, type, do and don’t

02 **Level 1: Simple** 11
Cards, big numbers, scorecards

03 **Level 2: Graphs** 13
Charts, tables, diagrams, builds

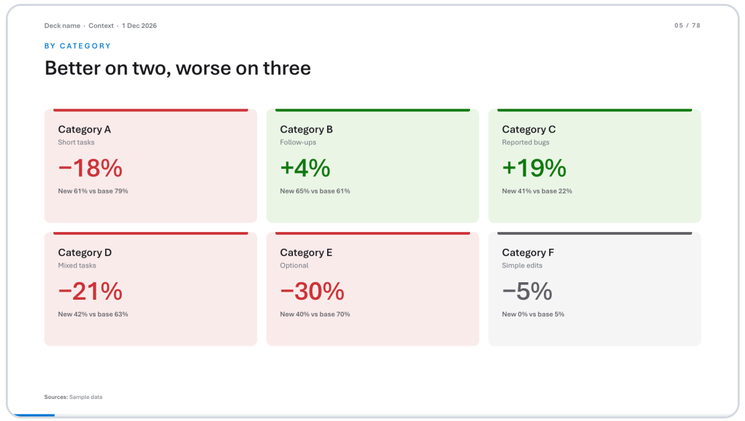

04 **Level 3: Illustrations** 18
Drawn objects and click-by-click pictures

05 **Writing and shapes** 29
Titles, deck outlines, the checks

THREE LEVELS

One look, three levels of craft

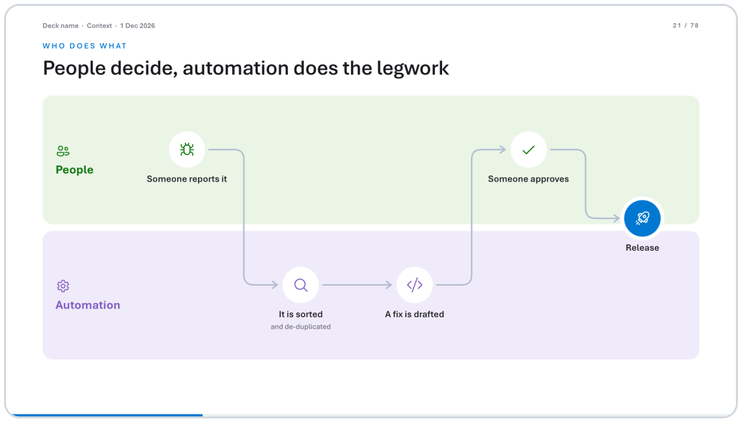

1 Simple

Updates and reviews: numbers and words carry it.

`cards scorecard bignumber breakdown versus takeaways`

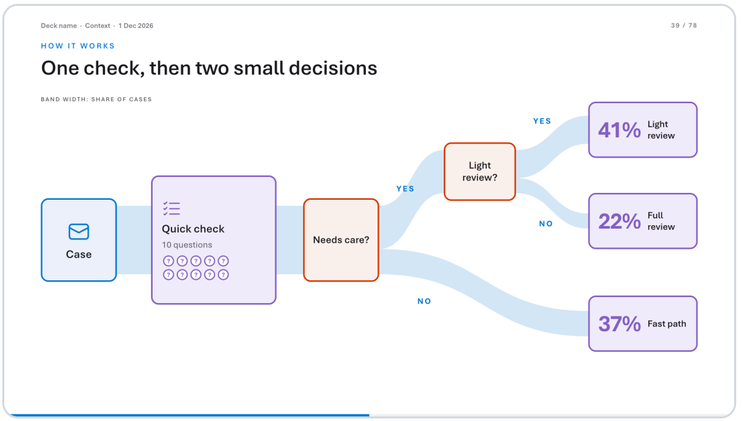

2 Graphs

Reports: a chart or a diagram carries it.

`bars funnel matrix flow pipeline lanes timeline cycle`

3 Illustrations

Big talks: a drawn object carries it.

`fork-cover sieve flow-bands dumbbell ladders launch`

Every slide makes one point

THE RULE

One slide, one point

The title says it. The rest proves it.

25

words at most

besides the title

01

A claim

The title is the sentence to remember.

02

A picture

Cards, a chart or a drawing carry it.

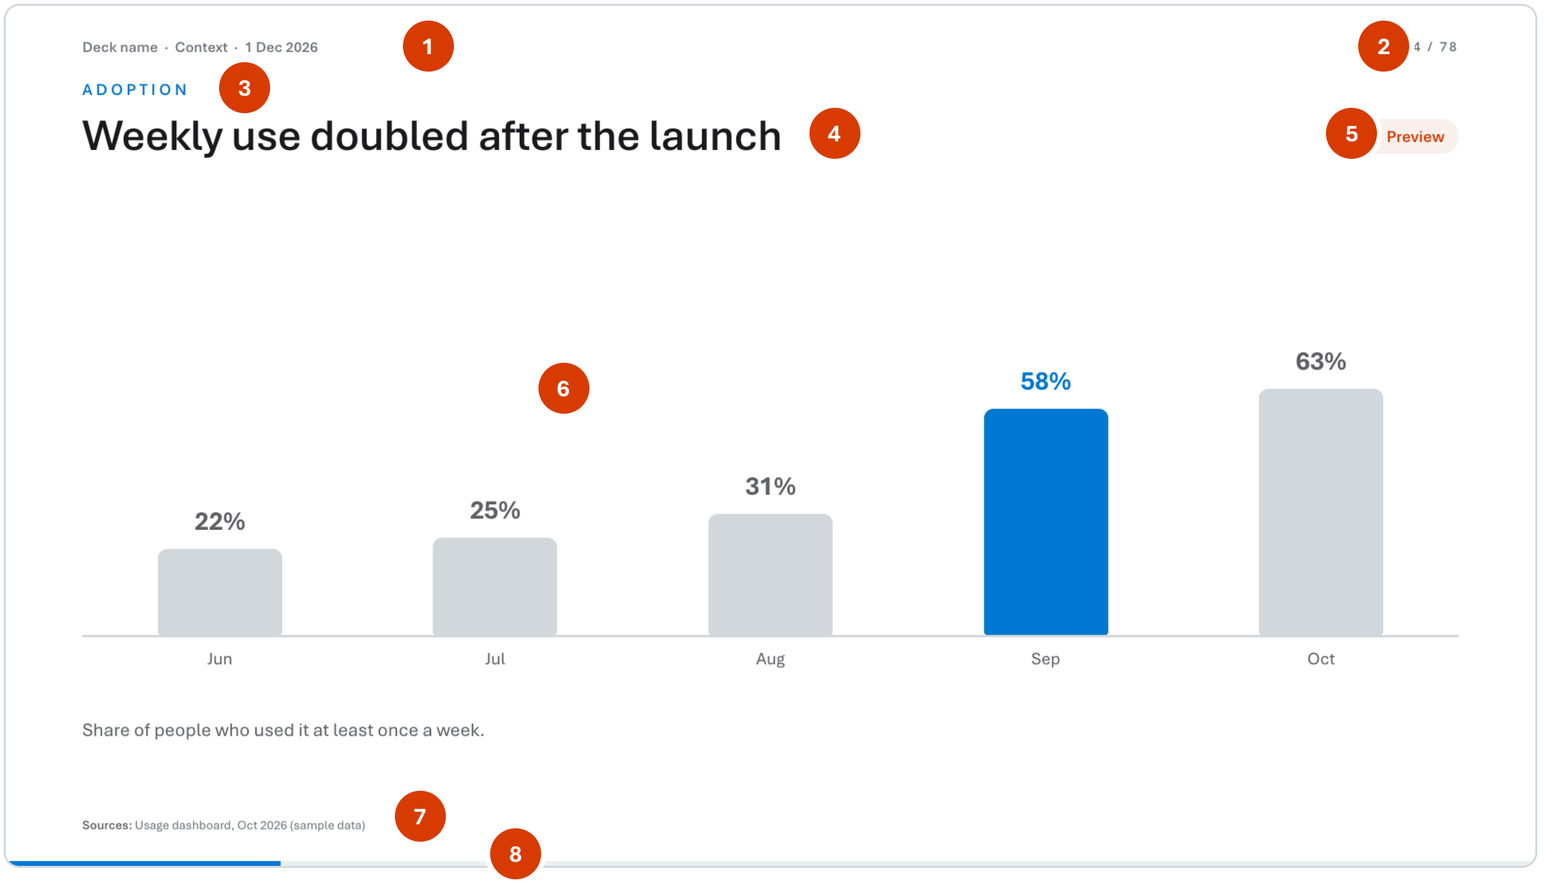

03

A source

Every number names where it comes from.

ANATOMY

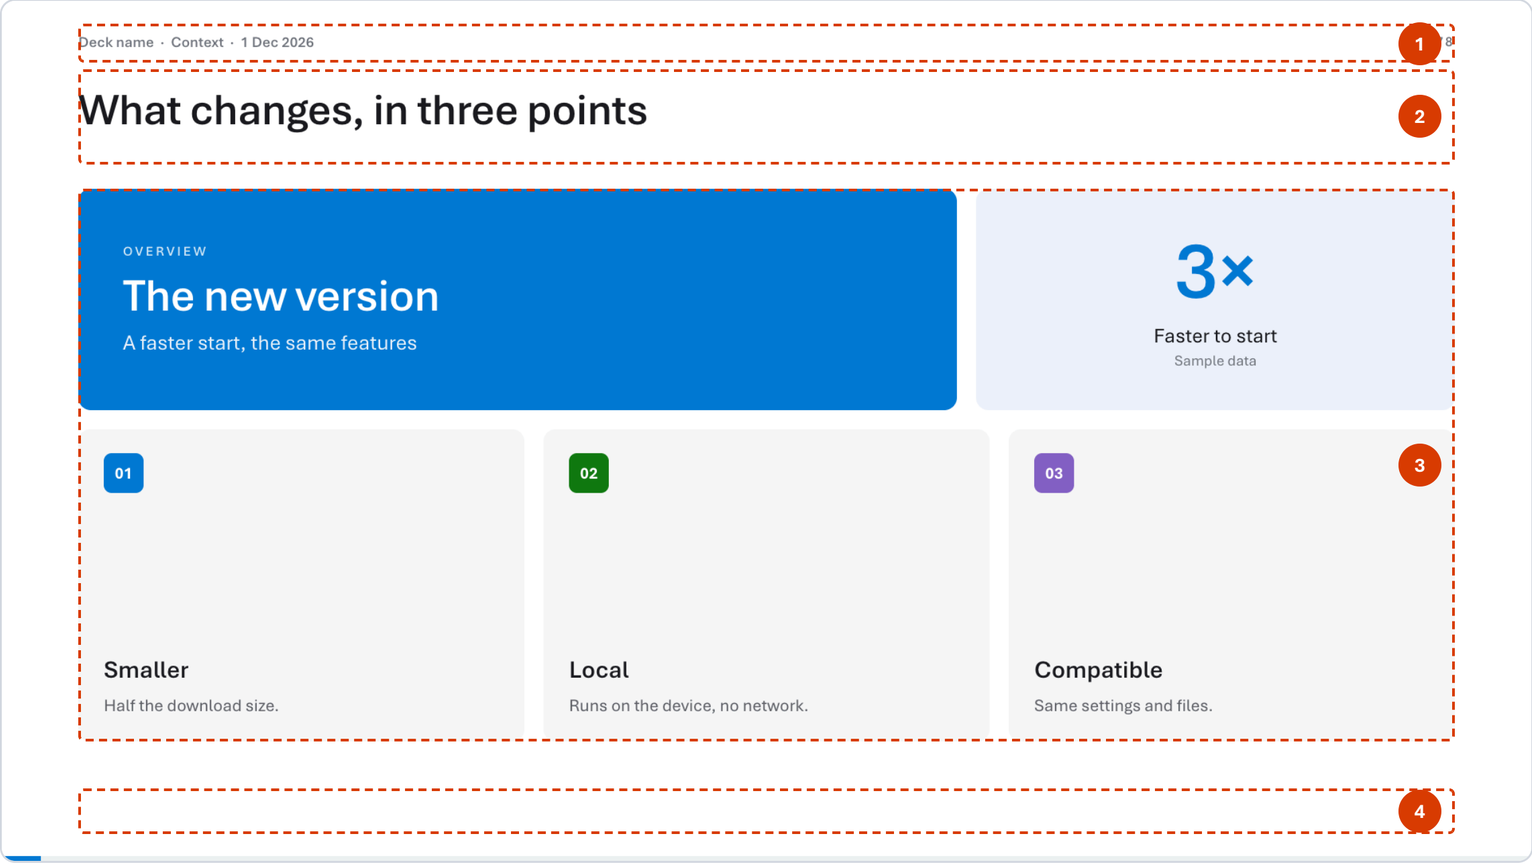

Every slide has the same frame

1. **Header line**
   Deck, context, date
2. **Counter**
   Slide number of total
3. **Eyebrow**
   The topic, 2–4 words, blue caps
4. **Title**
   The claim, 8 words or fewer
5. **Tag**
   Optional: Preview, Prototype
6. **The picture**
   Most of the page
7. **Sources**
   One line, every number
8. **Progress bar**
   Where we are in the deck

GRID

A 1920 × 1080 page, 96 px margins

1. **Header**
   Small grey line and counter
2. **Eyebrow and title**
   21 px caps, 56 px title
3. **Body**
   1728 × 694 px, the picture lives here
4. **Footer**
   Sources, then a 6 px progress bar

COLOUR

Each colour always means the same thing

Blue
#0078D4

tint #EEF4FD

Primary, neutral, the point

4.53 : 1

Green
#107C10

tint #EEF7EA

Good, done, a gain

5.37 : 1

Red
#D13438

tint #FBEEED

Bad, a loss. Rarely.

4.93 : 1

Orange
#D83B01

tint #FCF1EC

Attention, a warning

4.62 : 1

Purple
#8661C5

tint #F3EFFA

The AI, the model

4.64 : 1

Grey
#5F6168

tint #F5F6F8

Context, not the point

6.18 : 1

Ink
#1B1B1F · titles

Body
#5F6168 · text

Muted
#72767E · small text

Line
#E3E6EB · rules

Surface
#F5F6F8 · cards

TYPE

One type scale for every slide

Title XL 78 px · 600	Covers and closing lines
Title 56 px · 600	The claim on every slide
Sub 27 px · 400	One line under a title or a big number
Card title 30 px · 600	A card or a panel title
Body 24 px · 400	Text in cards, captions and table cells
Eyebrow 21 px · 600 · caps	THE TOPIC
Footnote 18 px · 400	Sources: where every number comes from

DO AND DON'T

Say the point, then show it

Don't

Deck name · Context · 1 Dec 2026 76 / 78

QUARTERLY REVIEW

Quarterly results

- **Revenue grew in most regions compared to last quarter**
  Strongest growth in the two markets we entered this year, weaker elsewhere
- **Customer satisfaction stayed roughly flat overall**
  Some improvement in support response times, but onboarding still slow
- **Costs increased slightly due to new hires and tools**
  Expected to stabilise next quarter as the new team ramps up

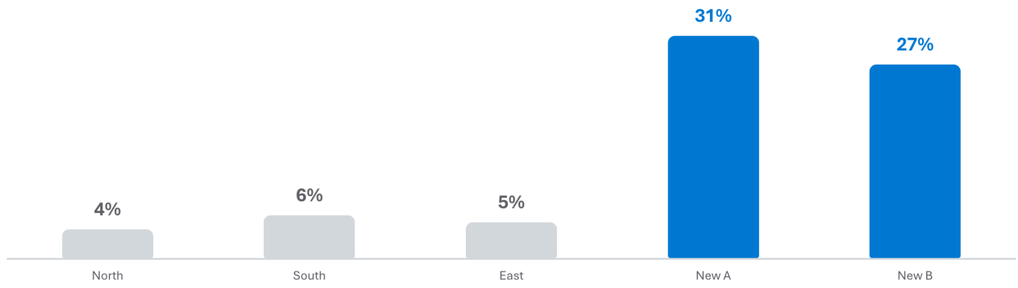

A topic for a title, and a paragraph per bullet.

Do

Deck name · Context · 1 Dec 2026 77 / 78

QUARTERLY REVIEW

Growth came from two new markets

Revenue growth by region, quarter on quarter.

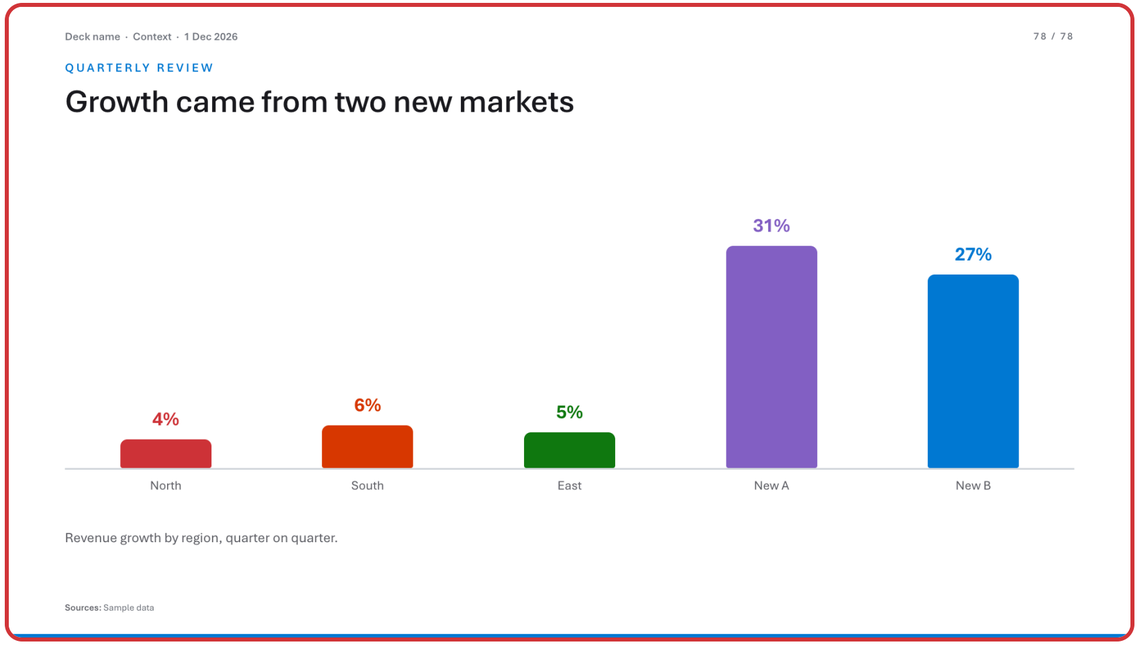

Sources: Sample data

The claim as the title, and a chart that proves it.

DO AND DON'T

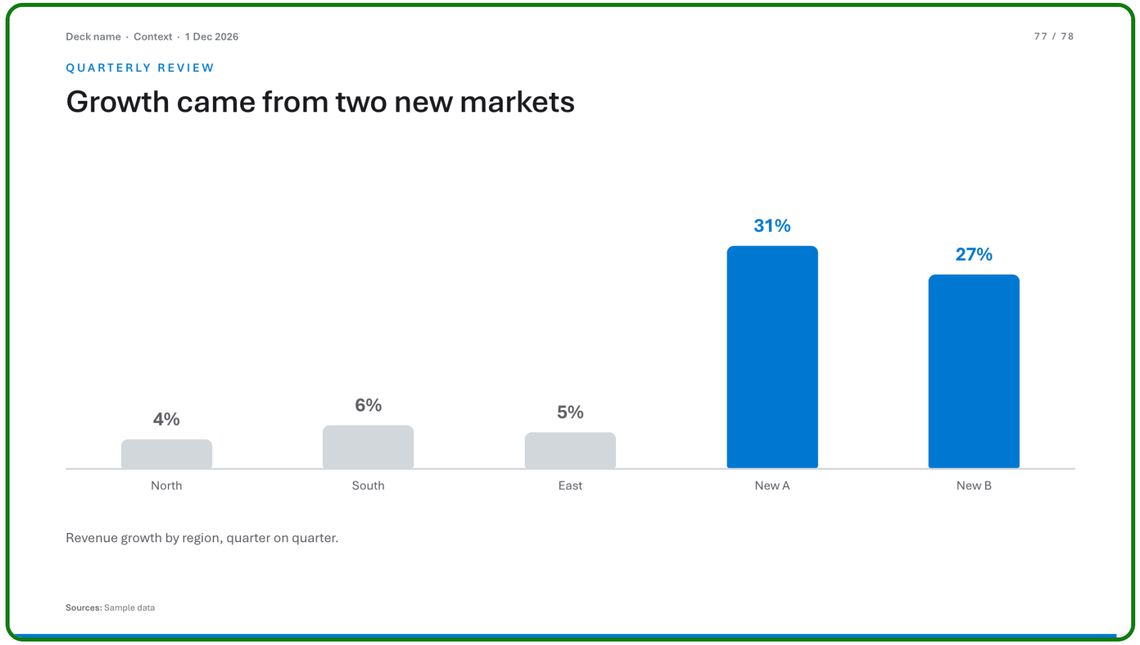

Colour marks what matters

Don't

A colour per bar: the eye has nowhere to go.

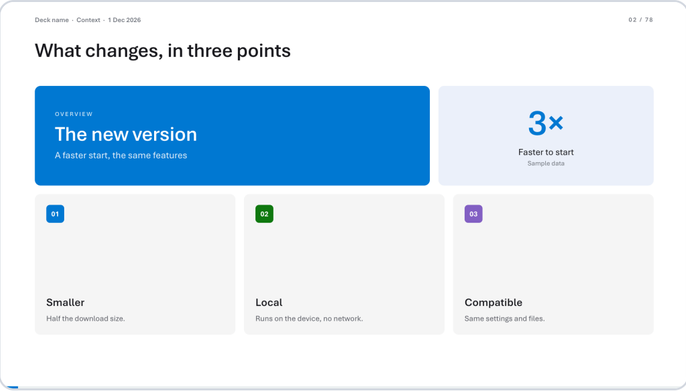

Do

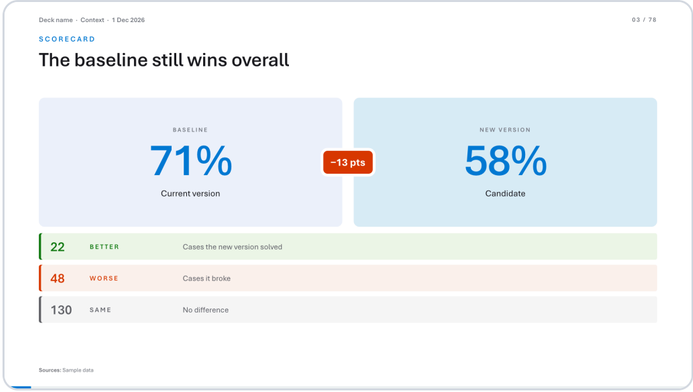

Grey for context, blue for the point.

LEVEL 1 · SIMPLE

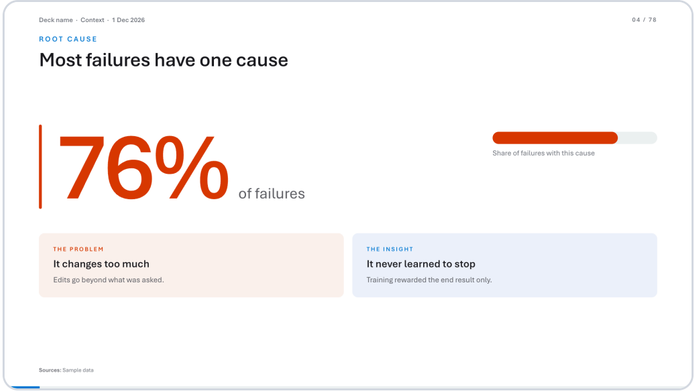

Cards and big numbers carry the point

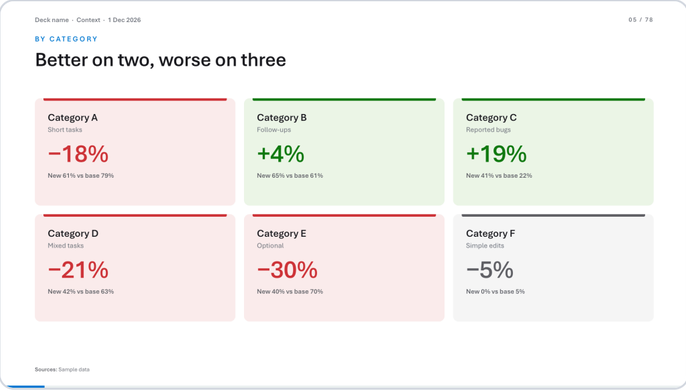

`cards` An overview in one page

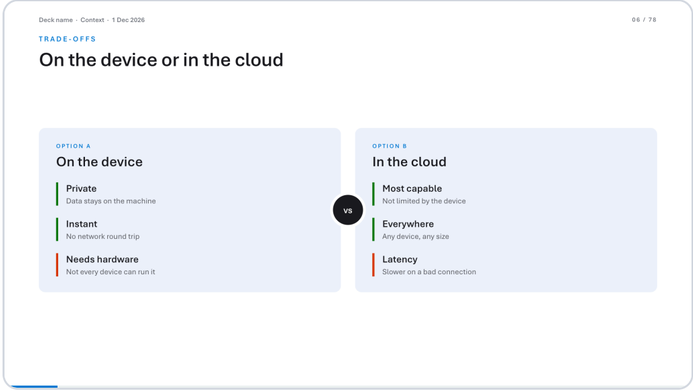

`scorecard` Two numbers, head to head

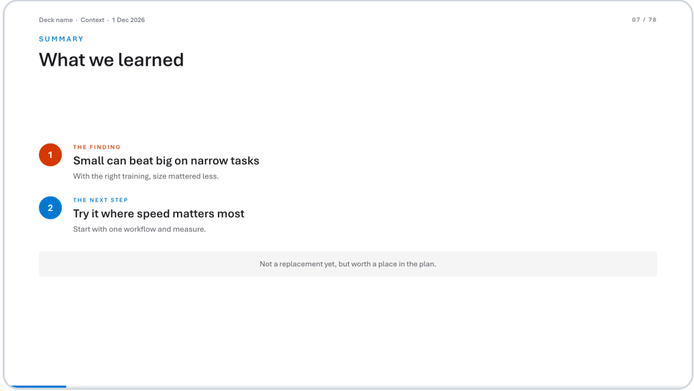

`bignumber` One number that is the point

`breakdown` A change per category

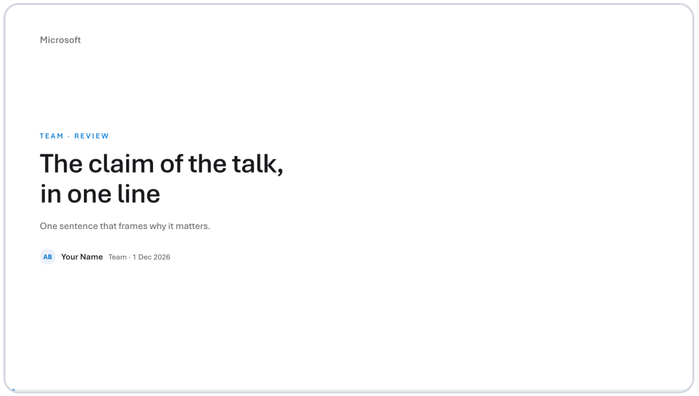

`versus` Two options, pros and costs

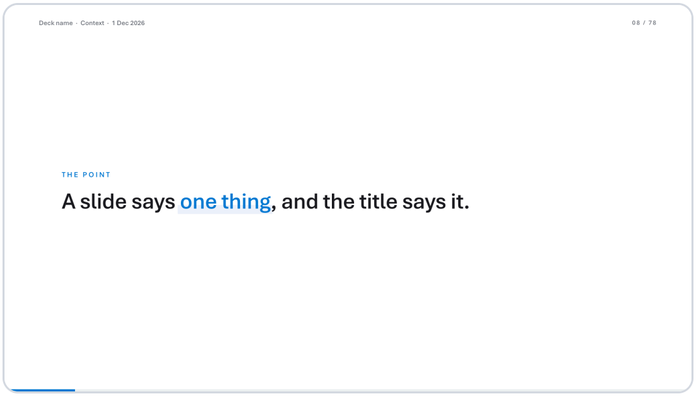

`takeaways` What to take away

LEVEL 1 · SIMPLE

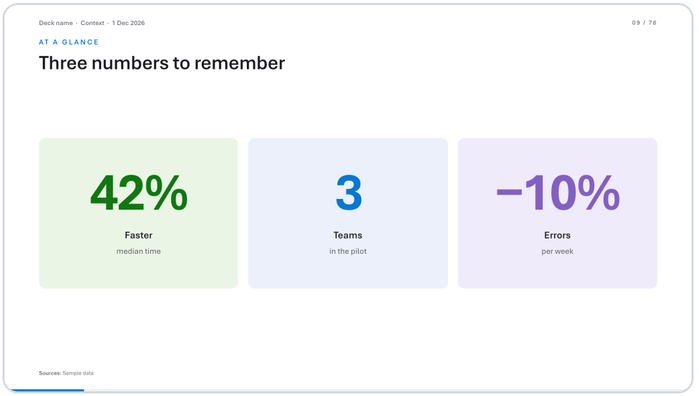

Openers, statements and closers

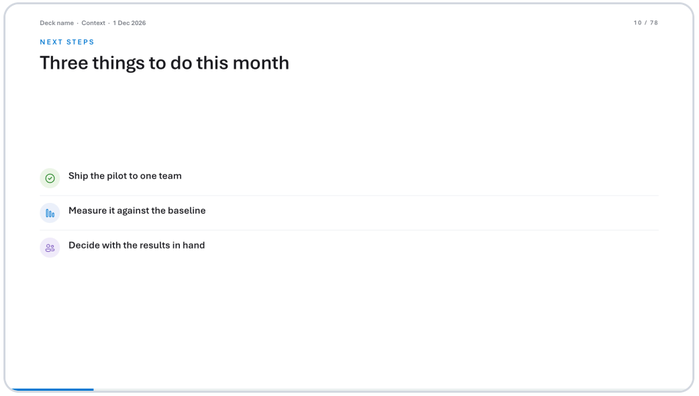

`title` The cover

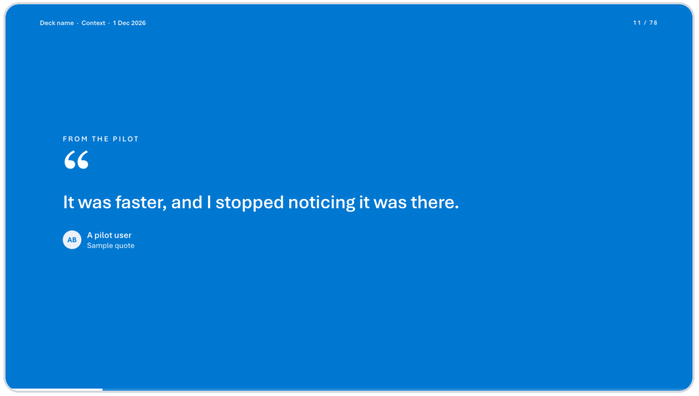

`statement` One sentence, one mark

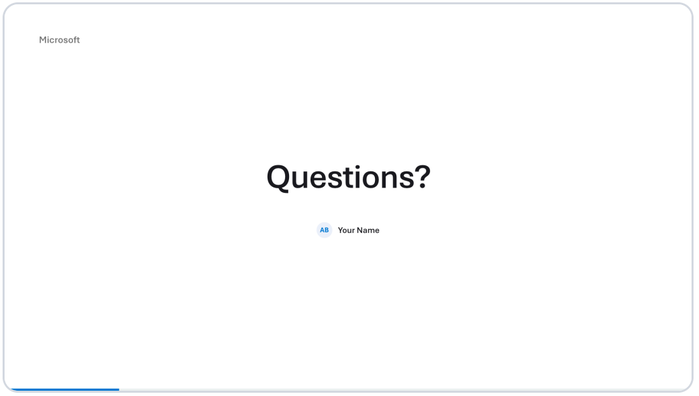

`counters` Up to three numbers

`checklist` Three to five actions

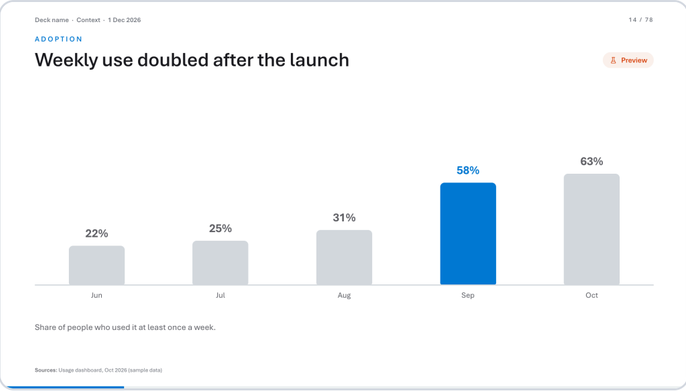

`quote` Real words, with a name

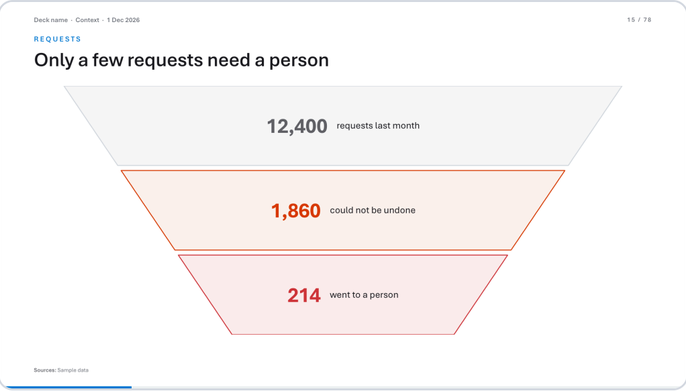

`close` One line, or questions

LEVEL 2 · GRAPHS

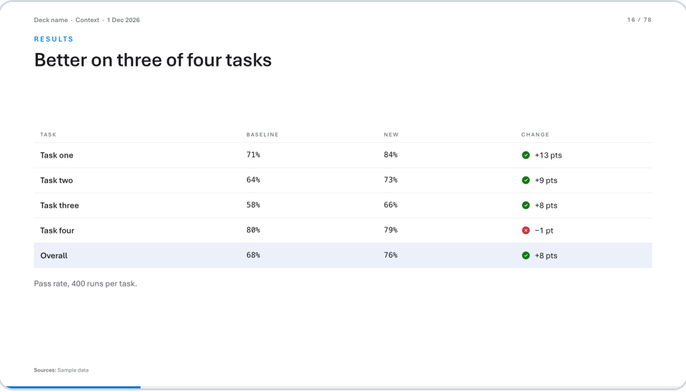

Charts and tables for numbers

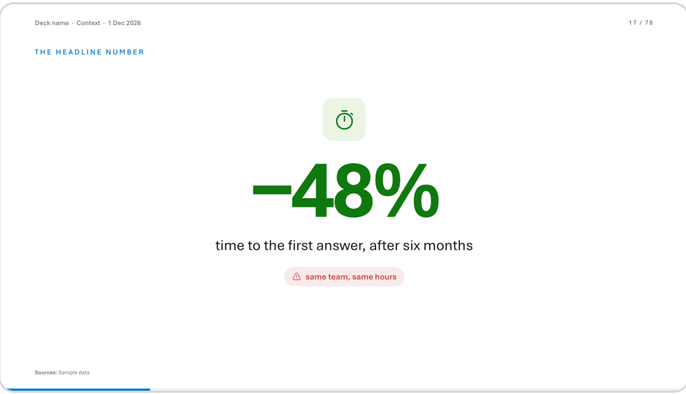

`bars` Compare values, one highlighted

`funnel` How a number narrows

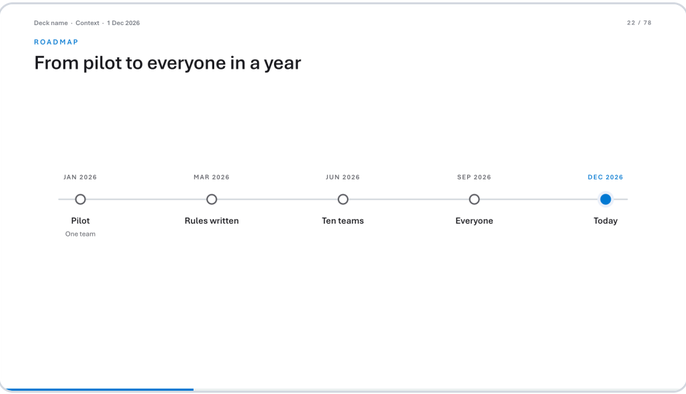

`matrix` A results table

`hero` One giant number

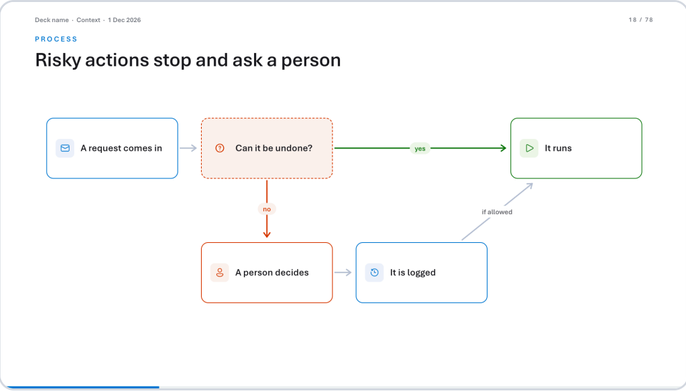

`split` Before and after

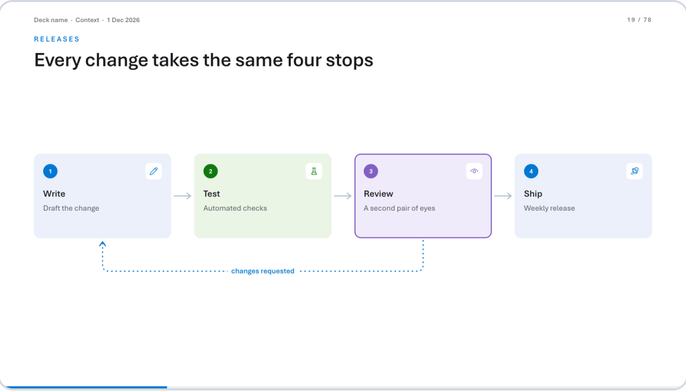

`timeline` Dates and today

LEVEL 2 · GRAPHS

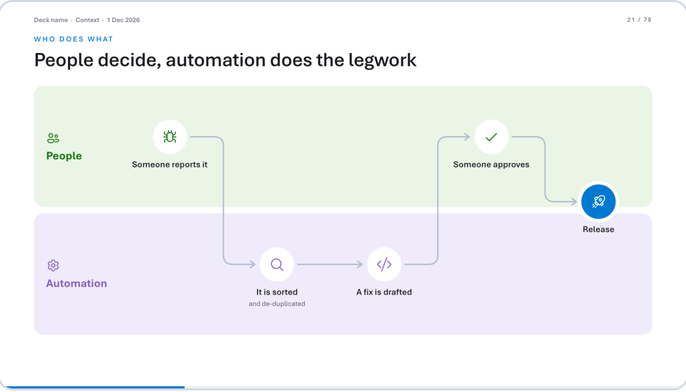

Diagrams for how things work

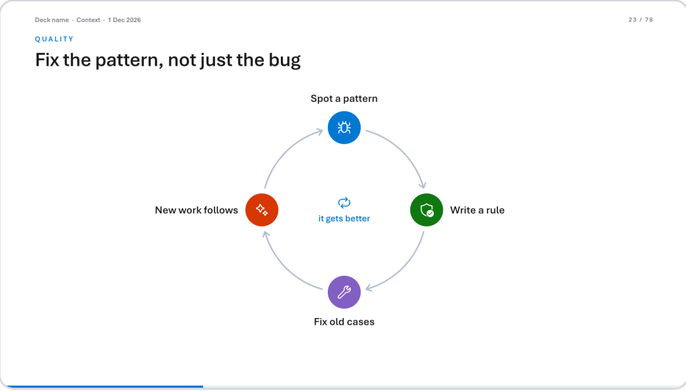

`flow` Steps with yes / no branches

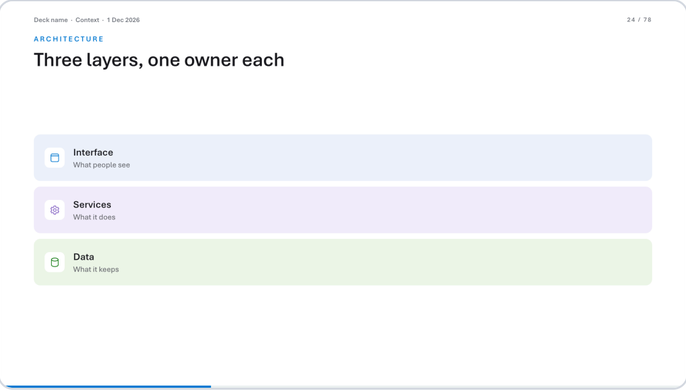

`pipeline` Stages left to right

`lanes` Who does what

`cycle` A loop that repeats

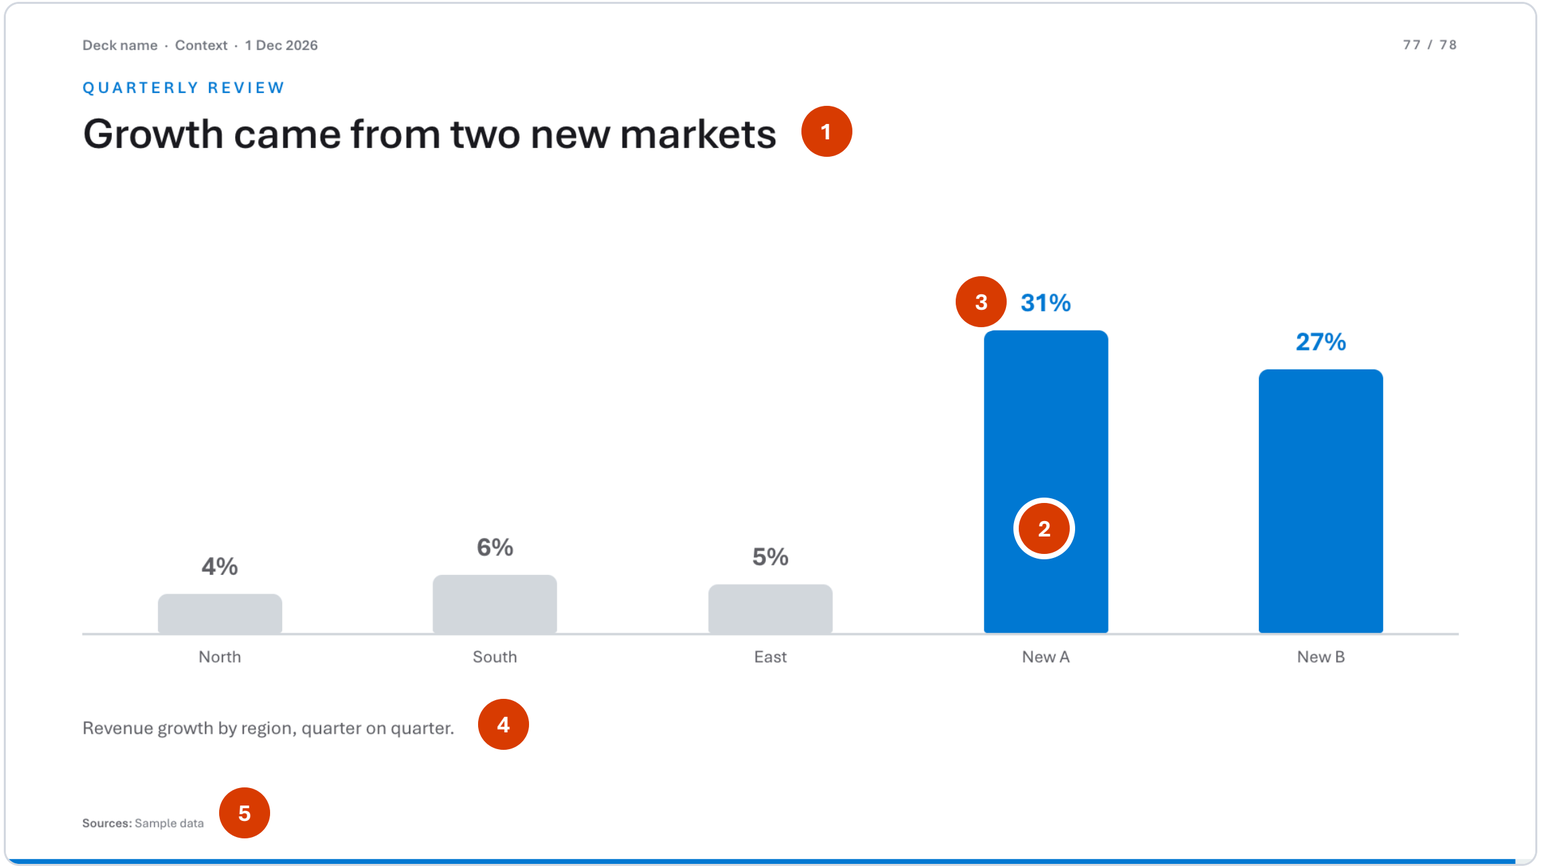

`layers` A stack of parts

`quad` A 2 × 2 decision

LEVEL 2 · GRAPHS

A chart makes one point

1 **The title is the finding**
Not “Growth by region”

2 **One highlight**
Blue for the point, grey for context

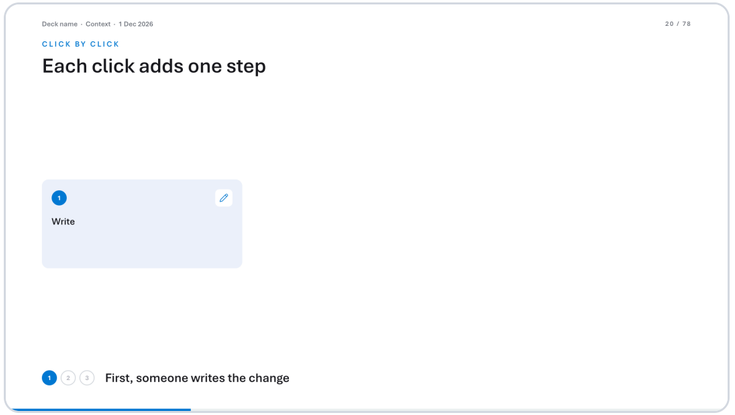

3 **Values on the bars**
No axis to read

4 **What is measured**
The unit, in one line

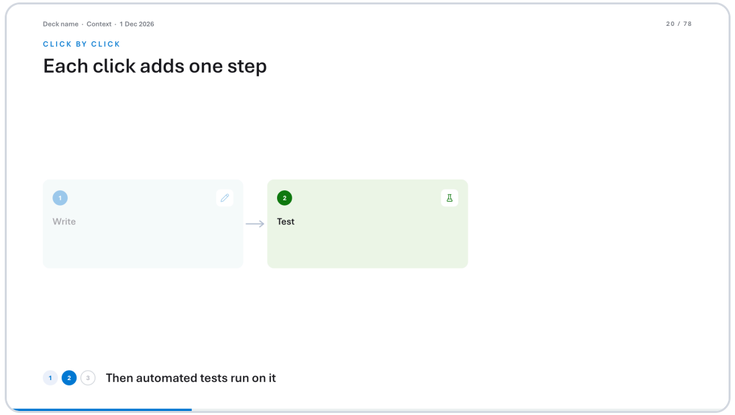

5 **Where it comes from**
Every chart has a source

LEVEL 2 · BUILDS

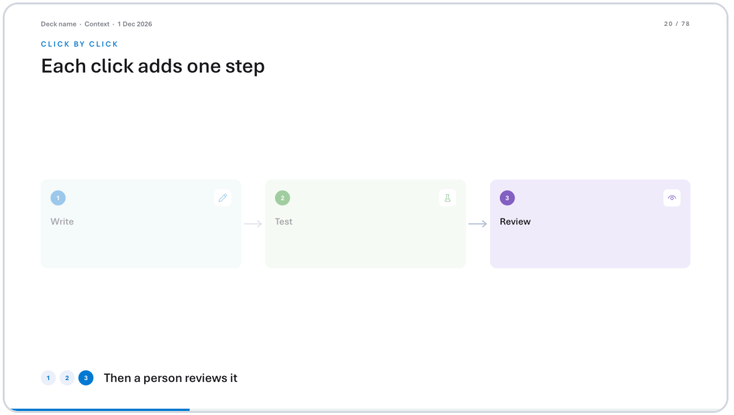

A click is the next page of the PDF

Click 1. One item, and a caption that says it.

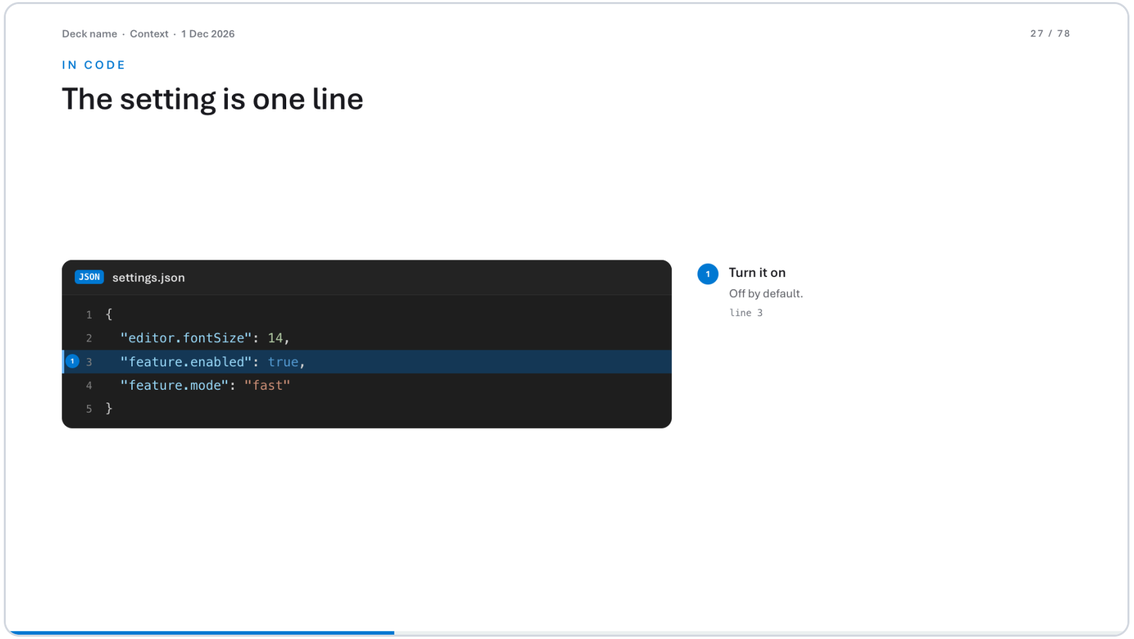

Click 2. The new item is bright, the old one fades.

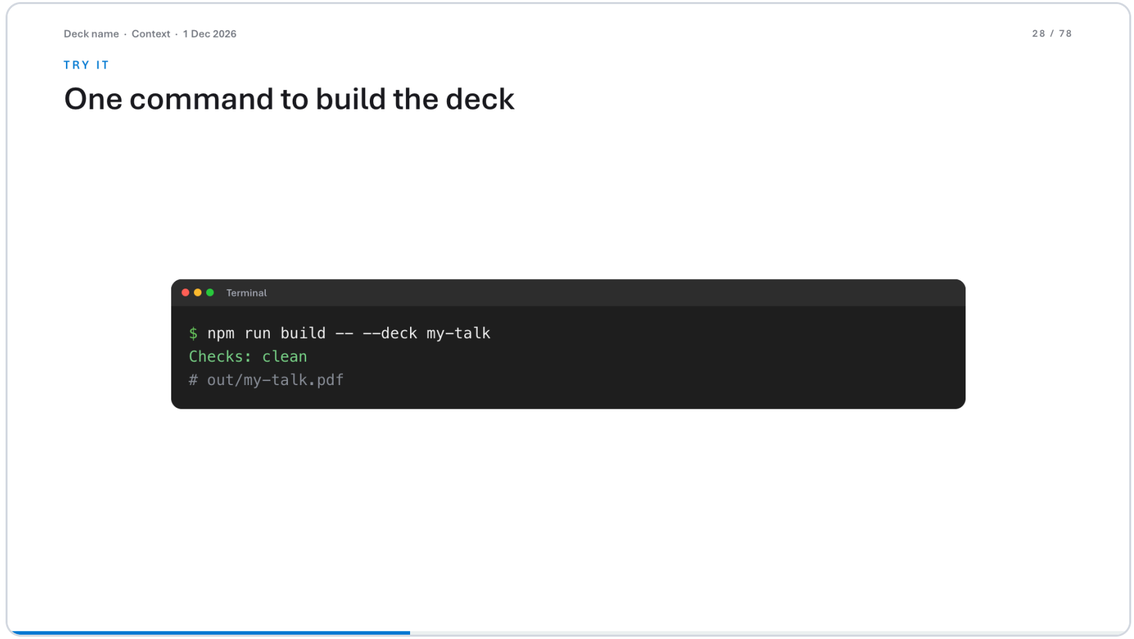

Click 3. Nothing moves; the caption changes.

LEVEL 2 · GRAPHS

Code and commands, with callouts

`code` Up to 12 lines, notes beside them

`terminal` Commands and their output

LEVEL 3 · ILLUSTRATIONS

A drawn object makes an idea stick

1

ONE OBJECT

Pick an everyday thing that is the idea

A gate, a key, a road sign. If the names could be swapped for any topic, pick another.

2

DRAWN IN CODE

Draw a new picture for every deck

The designs here show the style. Invent your own object for your idea.

3

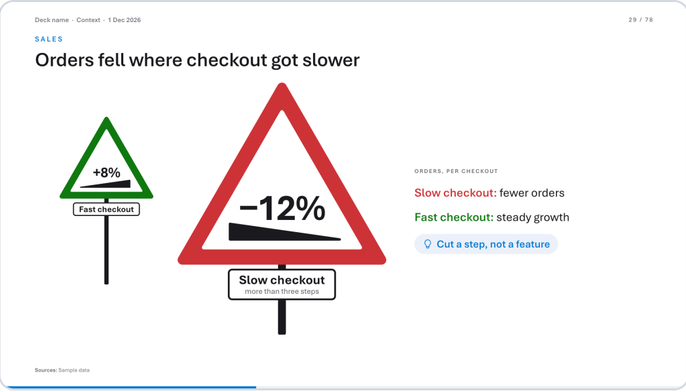

SAME LOOK

Same colours, lines and type as levels 1 and 2

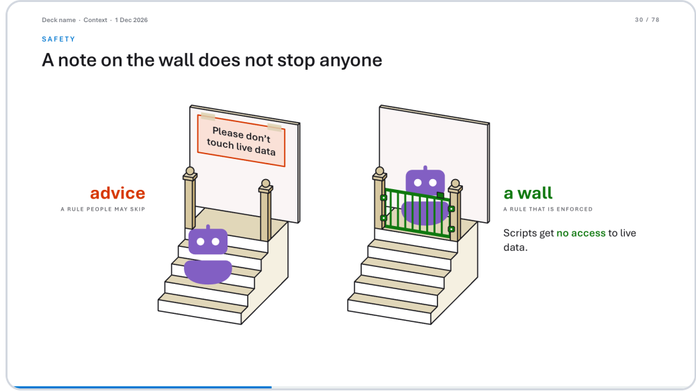

So drawings sit next to cards and charts.

LEVEL 3 · ILLUSTRATIONS

One object per idea

`roadsign` A change, as a warning sign

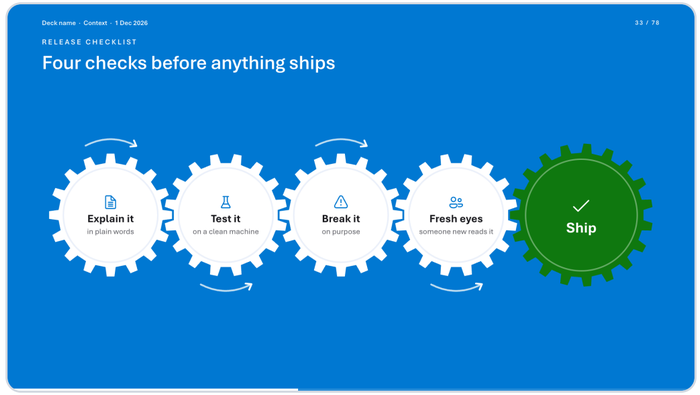

`gate` Advice versus a real barrier

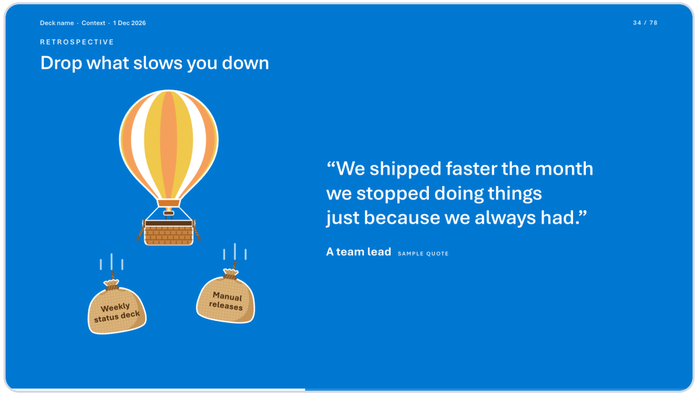

`metro` A decision as a metro map

`keyring` Levels of access as keys

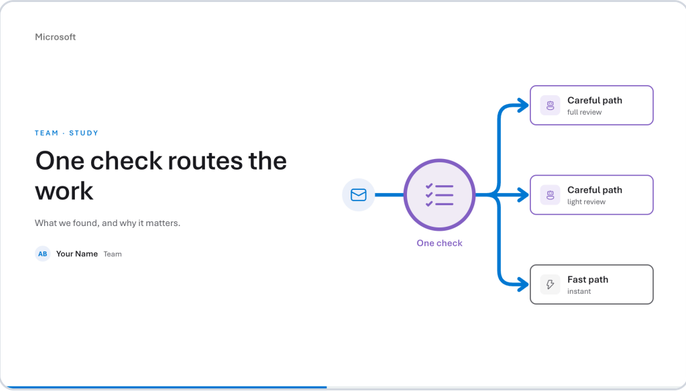

`gears` Checks that must all turn

`balloon` What to drop to go faster

LEVEL 3 · HOUSE STYLE

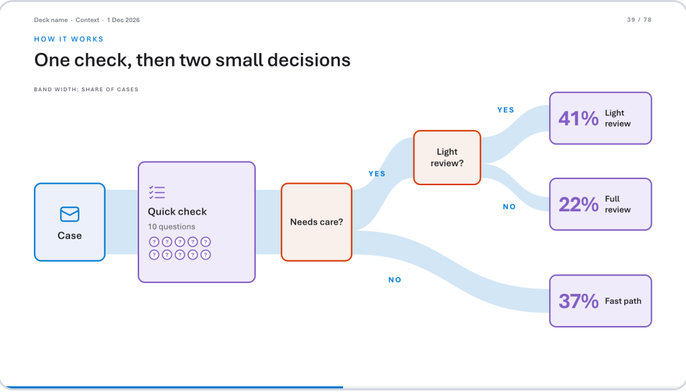

The six slides people pick

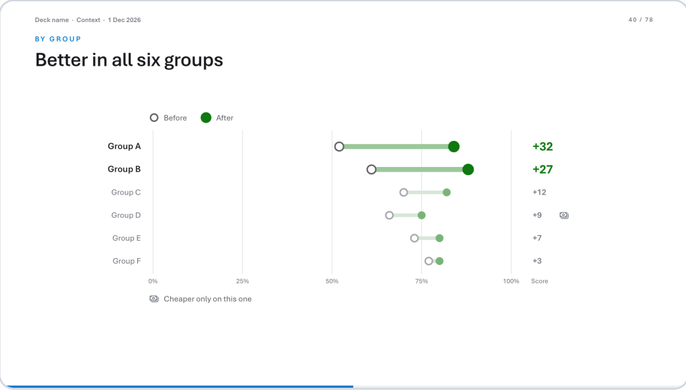

`fork-cover` The idea, drawn on the cover

`sieve` Numbers you can count

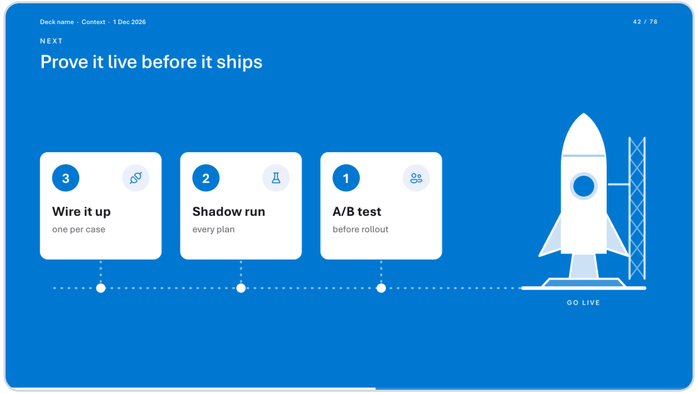

`flow-bands` A flow sized by share

`dumbbell` The few that matter, bold

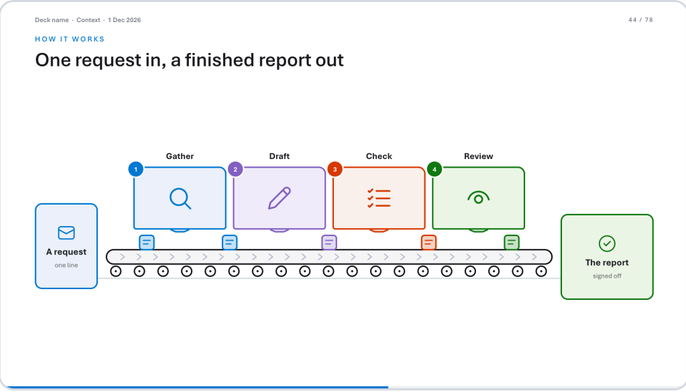

`ladders` One object, giant results

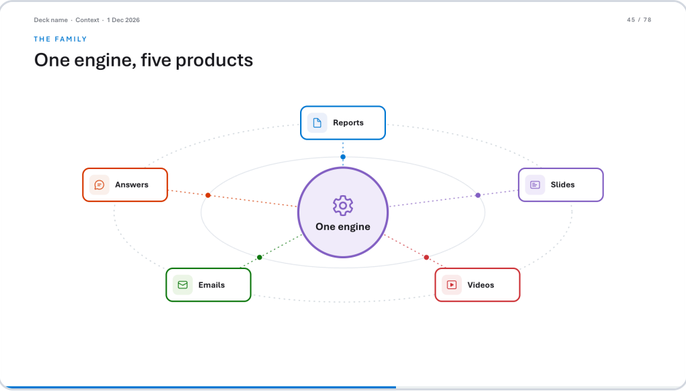

`launch` A drawn close

LEVEL 3 · MORE ILLUSTRATIONS

Machines for how it works

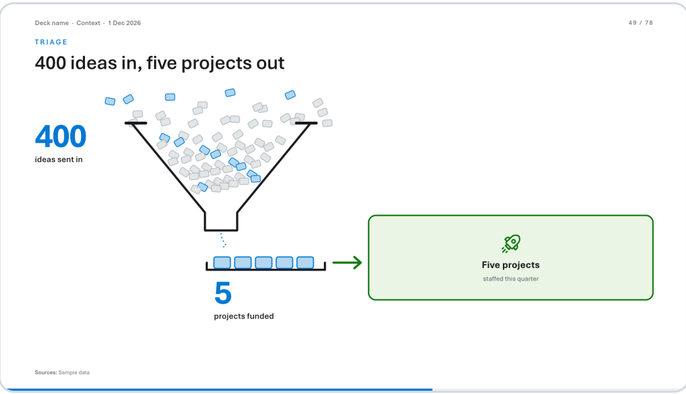

`factory` Steps as machines on a belt

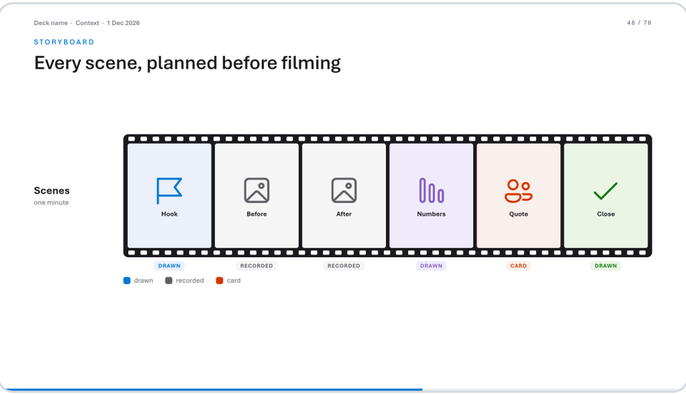

`orbit` One engine, many products

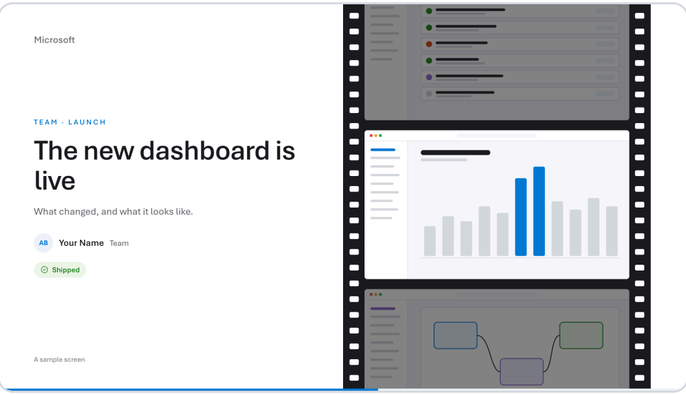

`devices` What goes in, what comes out

`hopper` Many in, a few out

`film-strip` Scenes, pictures or drawn cells

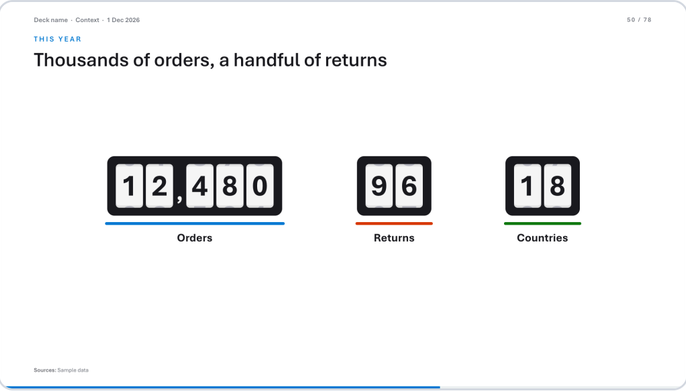

`picture-cover` A cover with a real picture

LEVEL 3 · MORE ILLUSTRATIONS

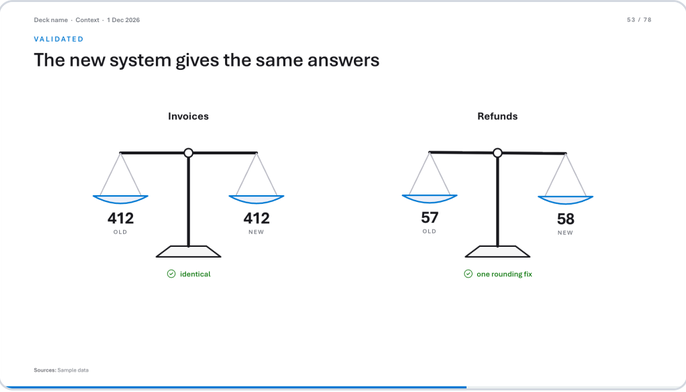

Objects for counting and comparing

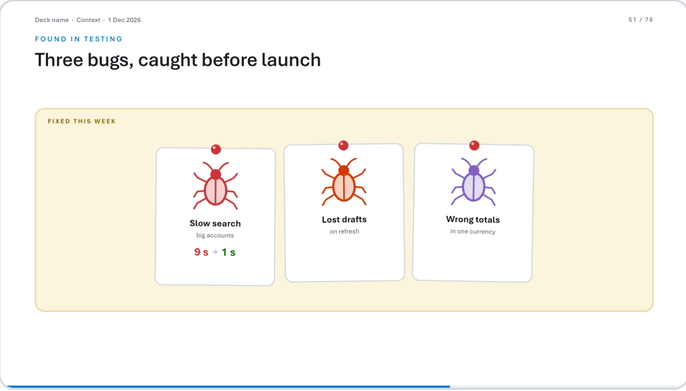

`stopwatch` Time, split into parts

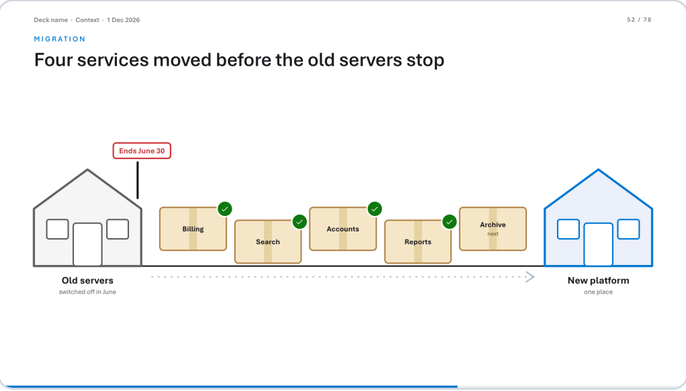

`odometer` Big running totals

`scales` Two values that should match

`pinboard` Bugs found, and what changed

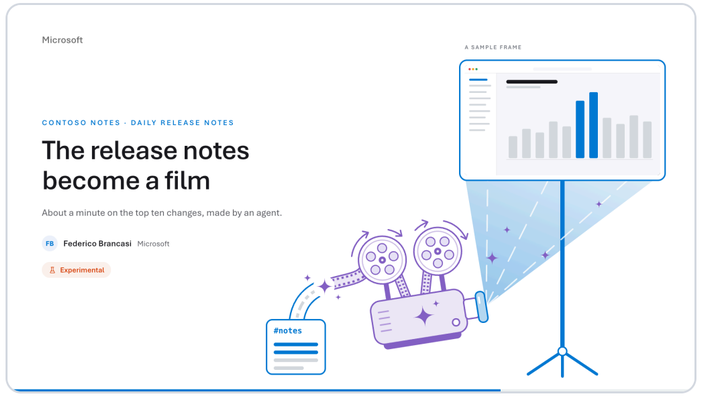

`moving` A migration against a deadline

LEVEL 3 · GALLERY

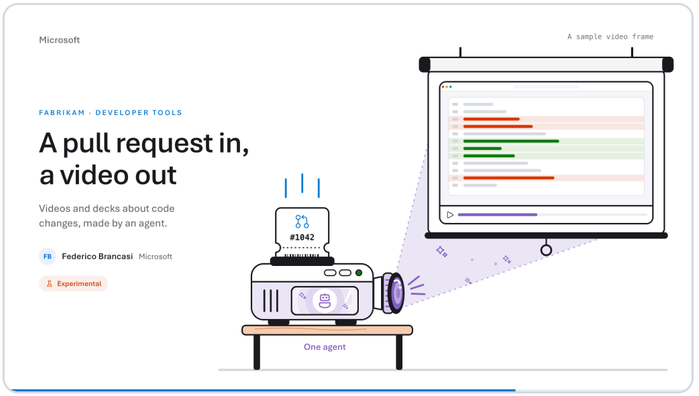

Three decks, three worlds

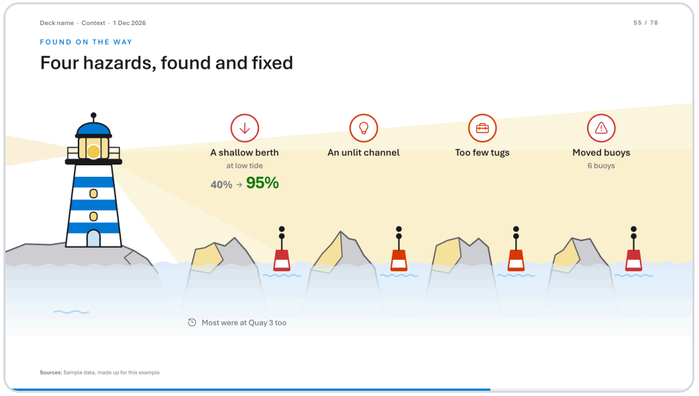

`new-terminal` A port: boxes you can count

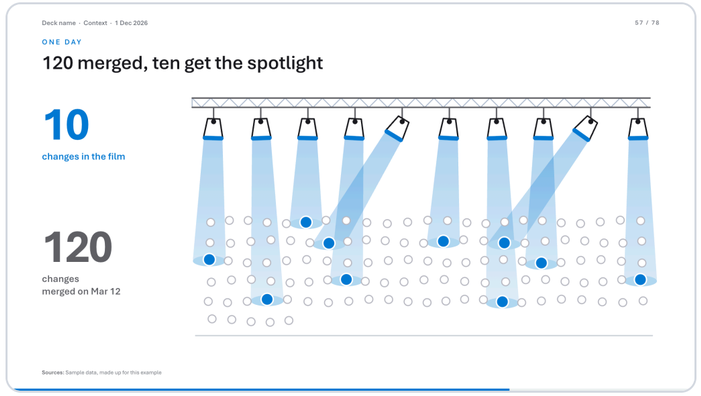

`daily-film` A cinema: a page becomes film

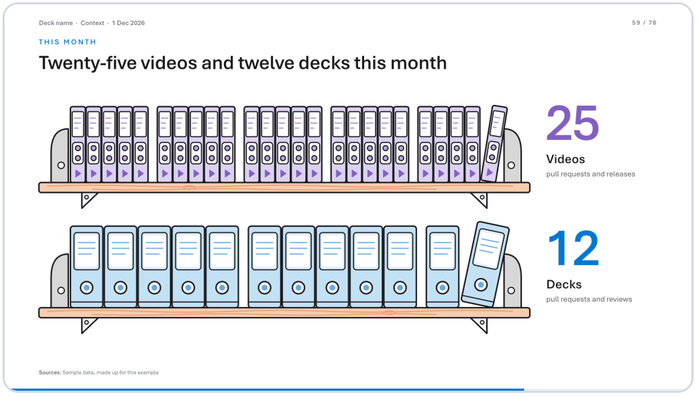

`pr-videos` A studio: the agent inside the projector

`the same world` A lighthouse finds the hazards

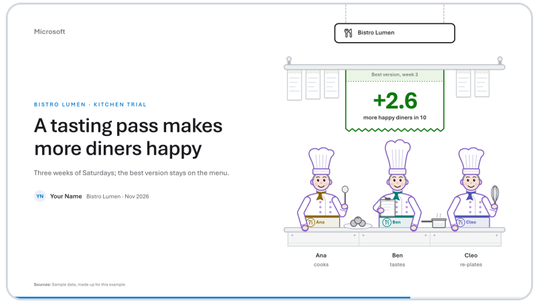

`the same world` Spotlights pick ten of many

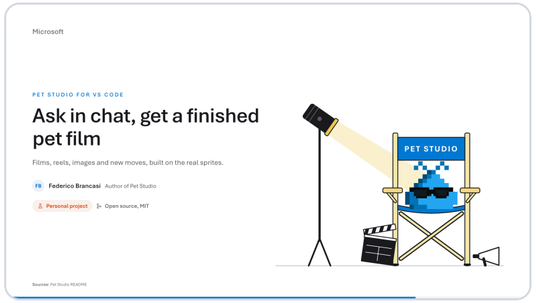

`the same world` Shelves you count in fives

LEVEL 3 · GALLERY

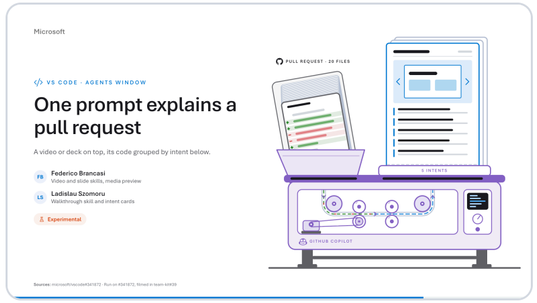

Four more worlds, drawn in detail

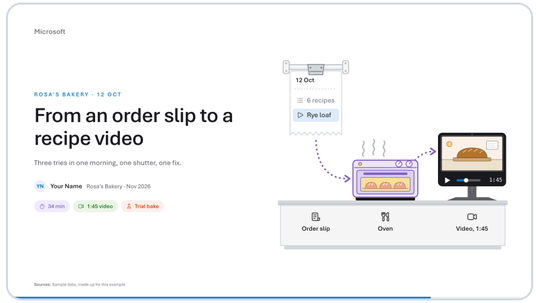

`tasting-pass` A kitchen

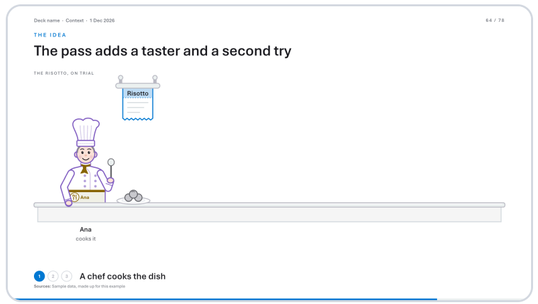

`pet-studio-example` A film set

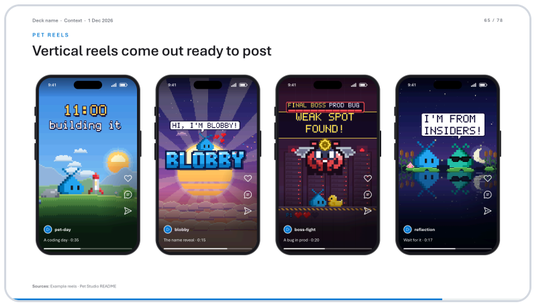

`code-walkthroughs-example` A press

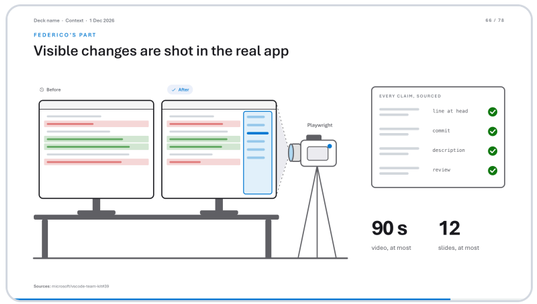

`first-order` A bakery

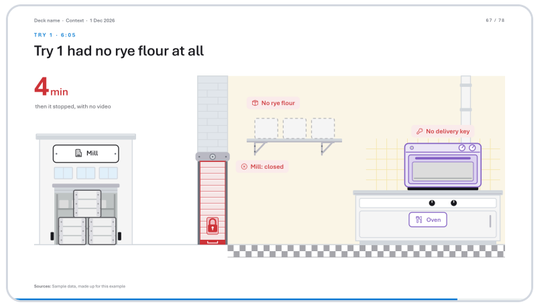

`kitchen` One chef, every pose

`film set` Reels on iPhones

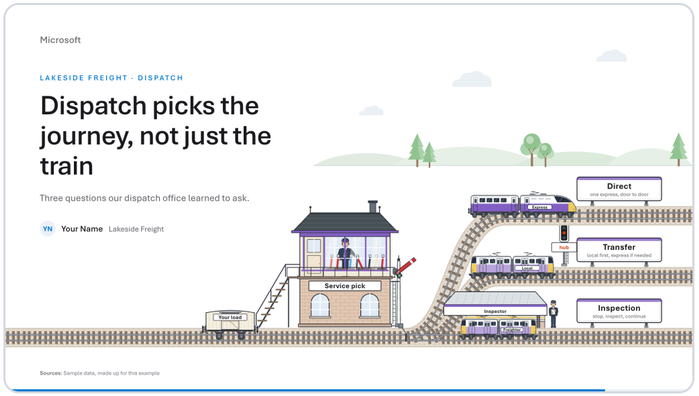

`press` Filmed in the app

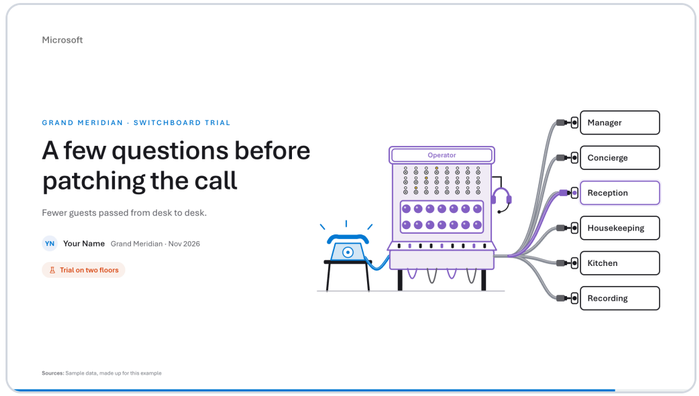

`bakery` A door that closes

LEVEL 3 · GALLERY

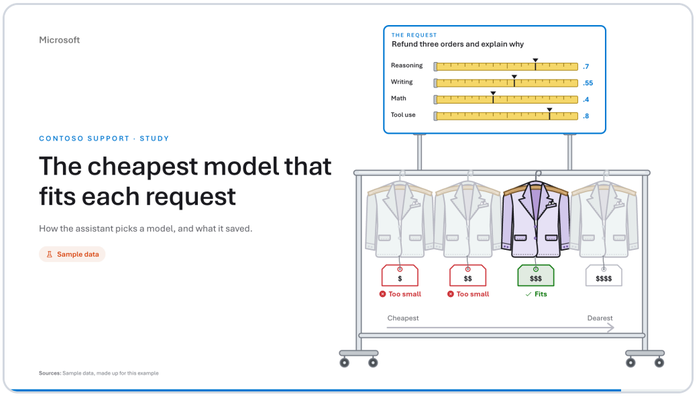

Six more worlds

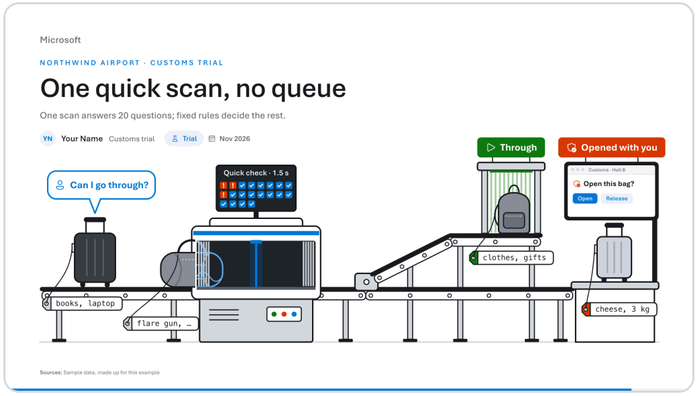

`freight-line` A railway

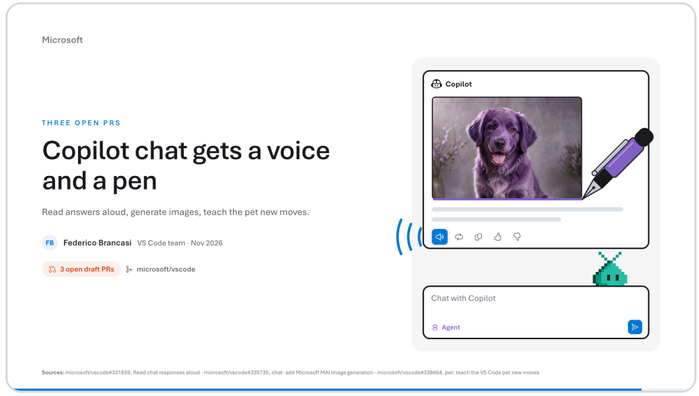

`switchboard` A switchboard

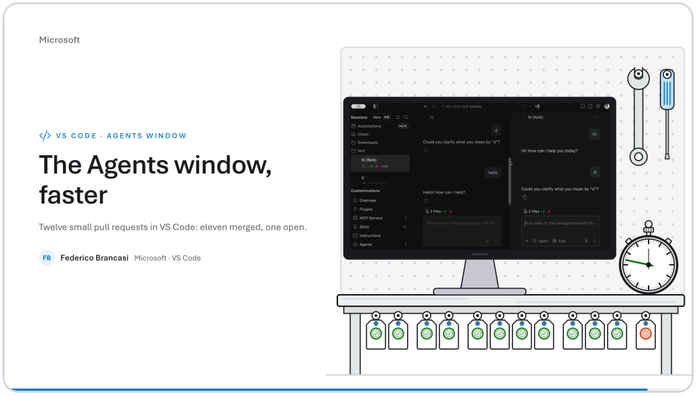

`fitting-room` A tailor’s rack

`green-channel` A customs hall

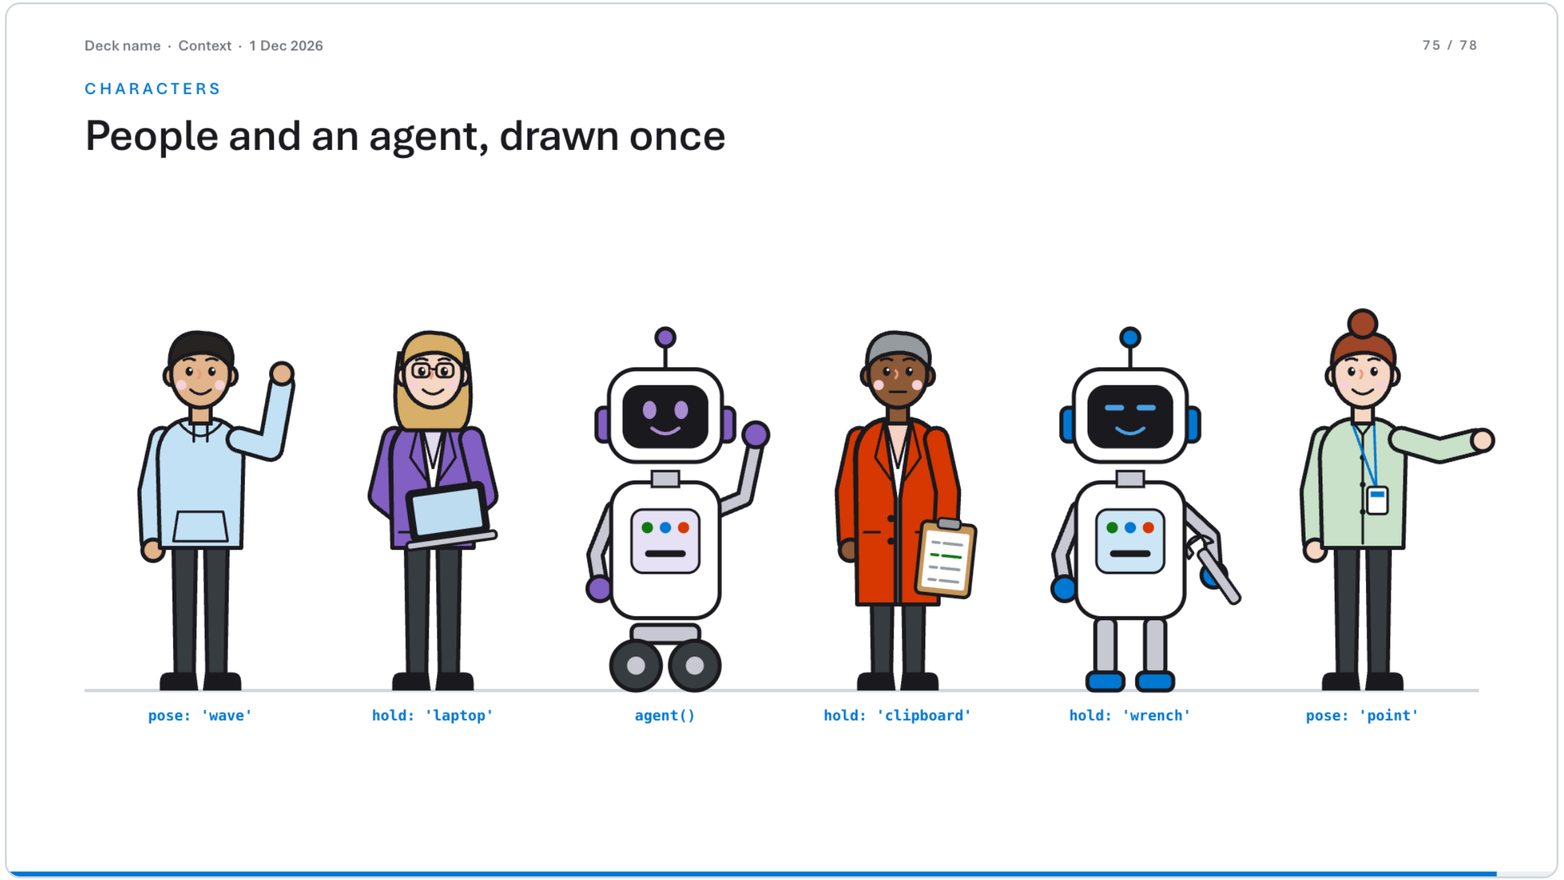

`chat-media` A voice and a pen

`agents-speed` A workbench

LEVEL 3 · CHARACTERS

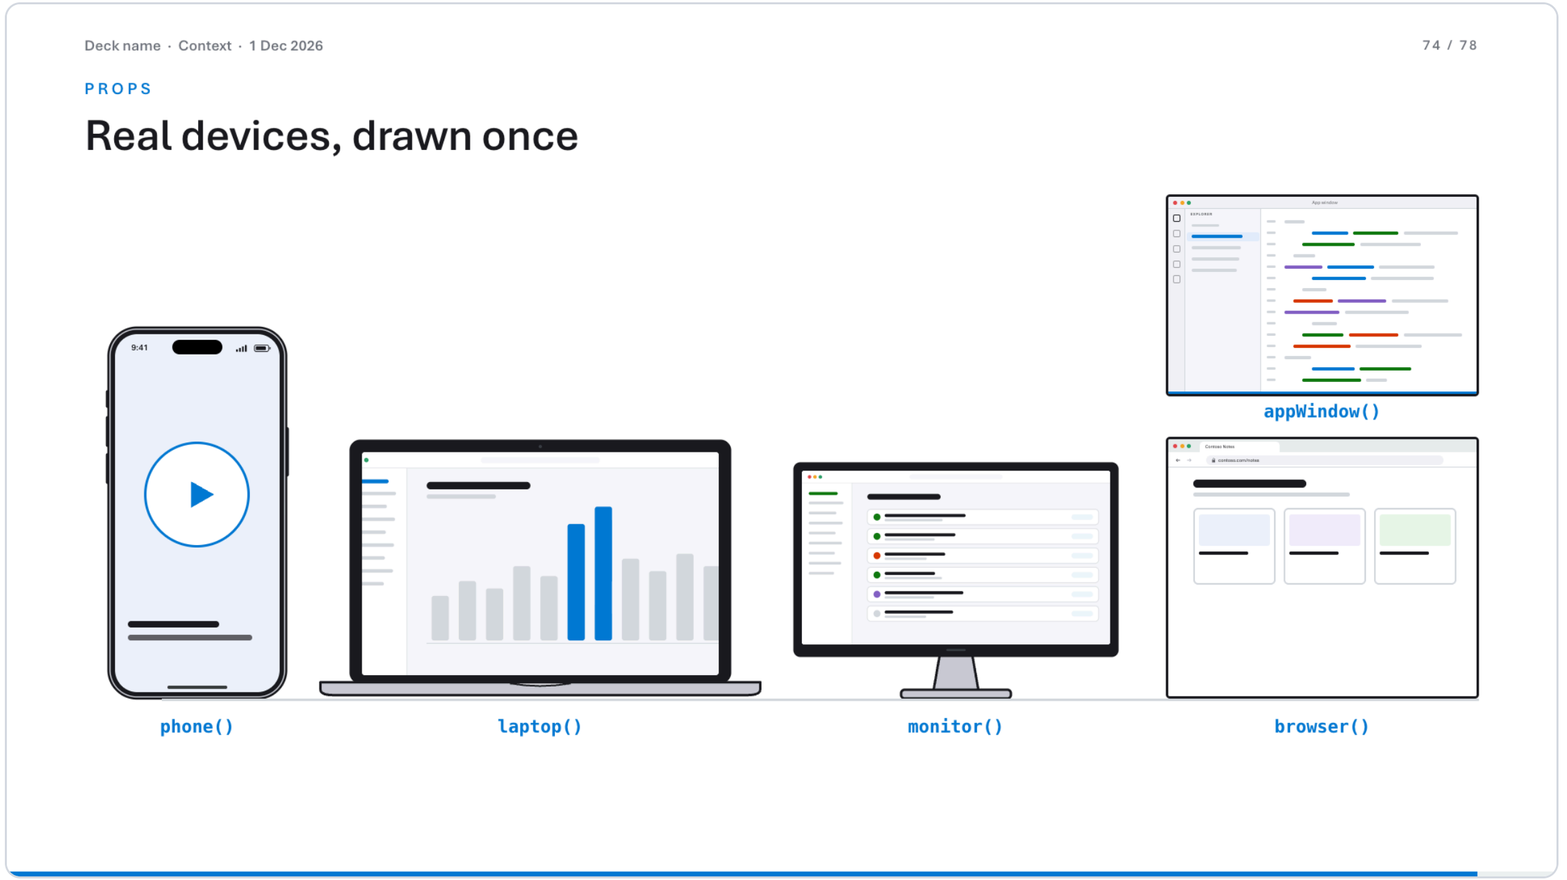

People and an agent, drawn once

`src/characters.mjs` person() and agent(): poses, outfits and what they hold

LEVEL 3 · PROPS

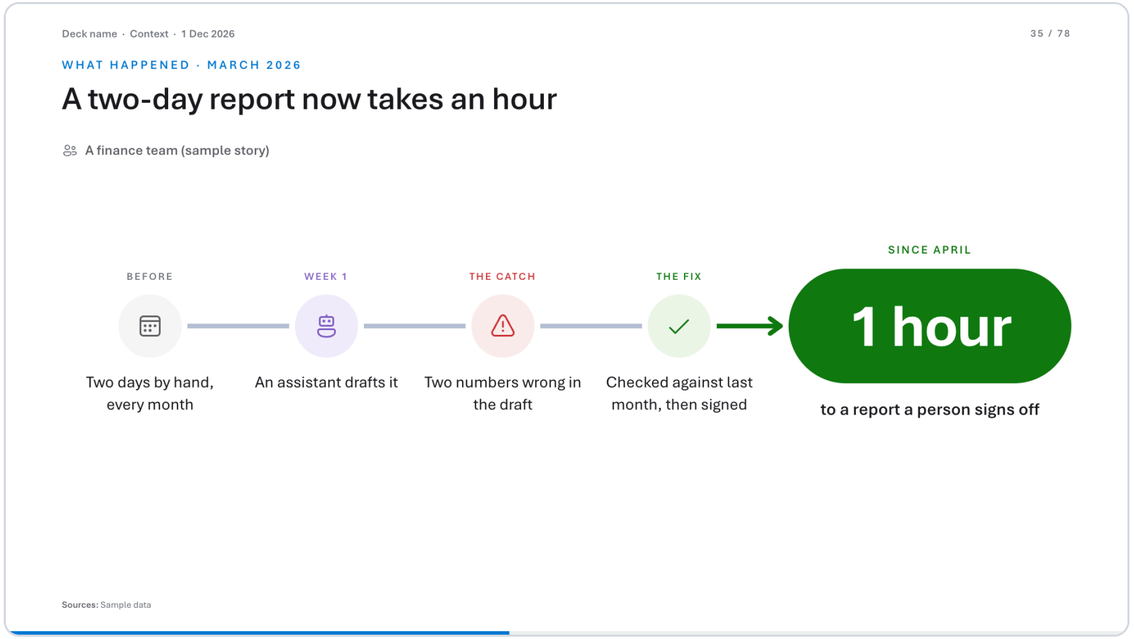

Devices and windows, drawn once

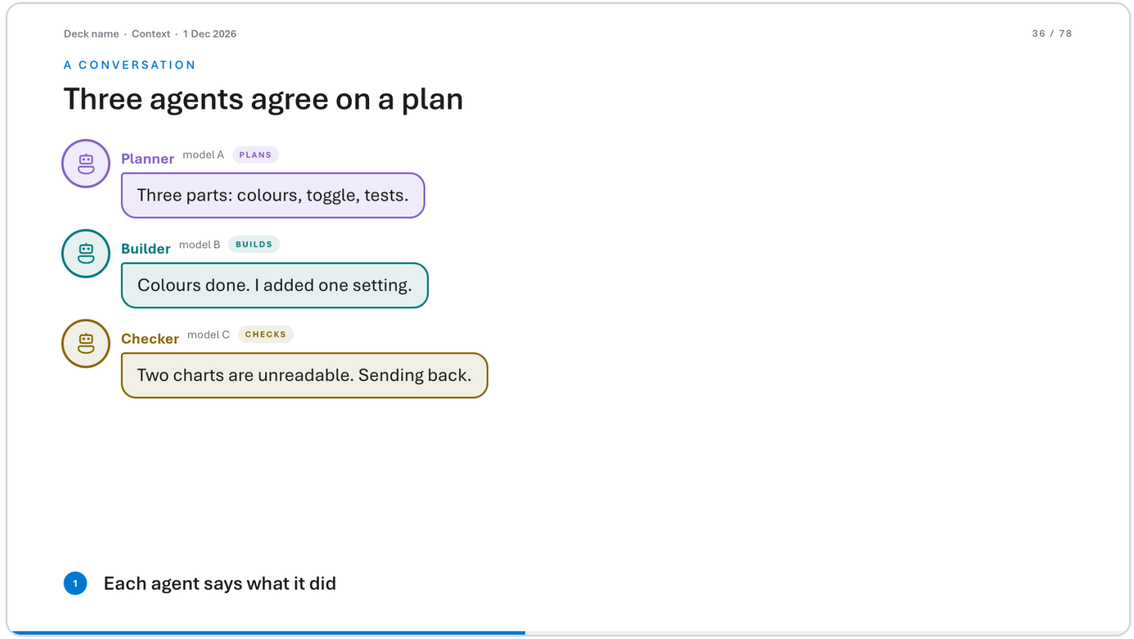

`src/props.mjs` phone, laptop, monitor, appWindow, browser: frames that hold a real screen

LEVEL 3 · ILLUSTRATIONS

Stories and conversations

`story` What happened, in beats

`convo` A conversation, one message per click

WRITING

Write the title last, as a claim

INSTEAD OF	WRITE	WHY
✗ **Q3 results**	✓ Q3 grew on two new markets	It says what to think
✗ **Architecture**	✓ One queue replaces three services	It says what changed
✗ **10/11**	✓ 11 Oct 2026	It reads the same everywhere
✗ **+8**	✓ +8 pts, 400 runs	It has a unit and a size
✗ **Game-changing**	✓ Twice as fast	It can be checked

DECK SHAPES

Three outlines, one per level

An update

Level 1 · 5–8 slides

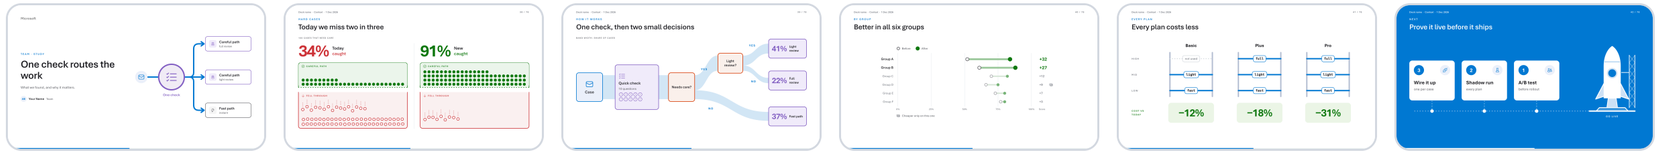

A report

Level 2 · 8–14 slides

A talk

Level 3 · 6–12 slides

BEFORE YOU PRESENT

Five checks before anyone sees it

The build ends with “Checks: clean”

```
npm run build -- --deck name
```

Every link and QR code opens

```
npm run links -- --deck name
```

Nothing private is on a slide

```
npm run privacy
```

The contact sheet looks even

No page much busier than the rest

Someone new reads only the titles

They should get the story

One point per slide.
Show it, and source it.
